INDEPENDENT AUDITOR'S REPORT
ORIGINALLY PREPARED AND ISSUED IN TURKISH**

To the Board of Directors of Türkiye Cumhuriyeti Ziraat Bankası A.Ş.;

Report on Consolidated Financial Statements

We have audited the accompanying consolidated balance sheet of Türkiye Cumhuriyeti Ziraat Bankası A.Ş. (“the Bank”) and its subsidiaries (collectively referred to as the “Group”) as at 31 December 2016 and the related consolidated statement of income, consolidated income and expense items under shareholders’ equity, consolidated statement of changes in shareholders’ equity, consolidated statement of cash flows for the year then ended and a summary of significant accounting policies and other explanatory notes.

Management’s Responsibility for the Consolidated Financial Statements

Bank management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with the “Banking Regulation and Supervision Agency (“BRSA”) Accounting and Reporting Legislation which includes “Regulation on Accounting Applications for Banks and Safeguarding of Documents” published in the Official Gazette no.26333 dated 1 November 2006, other regulations on accounting records of Banks published by BRSA, circulars and interpretations published by BRSA, and Turkish Accounting Standards for the matters not regulated by the aforementioned legislations and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Independent Auditor’s Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audit. Our audit was conducted in accordance with the “Regulation on Independent Audit of Banks” published by the BRSA on the Official Gazette No.29314 dated 2 April 2015 and Independent Auditing Standards that are part of Turkish Standards on Auditing published by the Public Oversight Accounting and Auditing Standards Authority (“POA”). Those standards require that ethical requirements are complied with and that the audit is planned and performed to obtain reasonable assurance whether the financial statements are free from material misstatement.

An independent audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on independent auditor’s professional judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to error or fraud. In making those risk assessments, the independent auditor considers internal control relevant to the bank’s preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the bank’s internal control. An independent audit includes also evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the independent audit evidence we have obtained during our audit is sufficient and appropriate to provide a basis for our audit opinion.

Basis for the qualified opinion

As mentioned in Section II. Note 7.d1 of Explanations and Notes to the Consolidated Financial Statements; as of 31 December 2016, the accompanying consolidated financial statements include a free provision amounting to TL 945.000 thousand (TL295.400 thousand of this provision amount was reversed from the income statement in the current year), provided by the Bank management in line with the conservatism principle considering the circumstances that may arise from any changes in the economy or market conditions.

Qualified opinion

In our opinion, except for the effect of the matter described in the “Basis for the qualified opinion” paragraph above, on the consolidated financial statements, the accompanying consolidated financial statements present fairly, in all material respects, the financial position of Türkiye Cumhuriyeti Ziraat Bankası A.Ş. and its subsidiaries as at 31 December 2016 and its financial performance and its cash flows for the year then ended in accordance with BRSA Accounting and Reporting Legislation.

Report on Other Responsibilities Arising From Regulatory Requirements

In accordance with subparagraph 4 of Article 402 of the Turkish Commercial Code No. 6102 (“TCC”); no significant matter has come to our attention that causes us to believe that the Bank’s bookkeeping activities for the period 1 January - 31 December 2016 are not in compliance with TCC and provisions of the Bank’s articles of association in relation to financial reporting.

In accordance with subparagraph 4 of Article 402 of the TCC; the Board of Directors submitted to us the necessary explanations and provided required documents within the context of audit.

Additional Paragraph for Convenience Translation

The effects of differences between accounting principles and standards explained in detail in Section Three and accounting principles generally accepted in countries in which the accompanying consolidated financial statements are to be distributed and International Financial Reporting Standards (“IFRS”) have not been quantified in the accompanying consolidated financial statements. Accordingly, the accompanying consolidated financial statements are not intended to present the financial position, results of operations and changes in financial position and cash flows in accordance with the accounting principles generally accepted in such countries and IFRS.

SECTION THREE

EXPLANATIONS ON ACCOUNTING POLICIES

I. BASIS OF PRESENTATION

The consolidated financial statements are prepared within the scope of the “Regulation on Accounting Applications for Banks and Safeguarding of Documents” related with Banking Law numbered 5411 published in the Official Gazette no.26333 dated 1 November 2006 and other regulations related to reporting and accounting principles on accounting records of Banks published by Banking Regulation and Supervision Agency (“BRSA”) and circulars and interpretations and in case where a specific regulation is not made by BRSA, Turkish Accounting Standards 34 “Interim Financial Reporting Standards” and Turkish Financial Reporting Standards (“TFRS”) and related appendices and interpretations (all referred as “BRSA Accounting and Financial Reporting Legislation” or “BRSA Principles”) put into effect by Public Oversight Accounting and Auditing Standards Authority (“POA”).

The format and content of the publicly announced consolidated financial statements and notes to these statements have been prepared in accordance with the “Communiqué on Publicly Announced Financial Statements, Explanations and Notes to These Financial Statements”, published in the Official Gazette No. 28337, dated 28 June 2012 and amendments to these Communiqué. The Parent bank maintains its books in Turkish Lira in accordance with the Banking Law, Turkish Commercial Code and Turkish Tax Legislation.

Financial statements of subsidiaries in abroad are prepared in accordance with prevalent law and legislation in their country, adjustments and reclassifications are reflected on the purpose of fair presentation pursuant to TFRS.

The consolidated financial statements have been prepared in thousands of Turkish Lira (TL), under the historical cost convention as modified in accordance with inflation adjustments applied until 31 December 2004, except for the financial assets and liabilities carried at fair value.

Consolidated balance sheet and consolidated statement of off-balance sheet commitments as of 31 December 2016 are presented comparatively with independently audited balances as of 31 December 2015 while consolidated income statement, consolidated statement of income and expense items accounted under shareholders’ equity, consolidated statement of cash flows and consolidated statement of changes in shareholders’ equity.

Unless otherwise specified, all balances in the financial statements and footnotes are expressed in Thousand Turkish Lira (“TL”).

The preparation of financial statements requires the use of certain critical estimates on assets and liabilities reported as of balance sheet date or amount of contingent assets and liabilities explained and amount of income and expenses occurred in related period. Although these estimates rely on the management’s best judgment, actual results can vary from these estimates. Judgements, estimates and the effects of the changes are explained in related notes.

The amendments of TAS and TFRS which have entered into force as of 1 January 2016 have no material impact on the Group’s accounting policies, financial position and performance. The amendments of TAS and TFRS, except TFRS 9 Financial Instruments, is predicted no impact on the accounting policies, financial condition and performance of the Group. The Group conducts the preparations in line with TFRS 9 Financial Instruments Standard, which will have entered into force as of 1 January 2018.

The accounting policies and valuation principles applied in the preparation of these financial statements are defined and applied in accordance with TAS. Those accounting policies and valuation principles are explained in Notes II. to XXVI. below.

Additional paragraph for convenience translation into English:

The differences between accounting principles, as described in the preceding paragraphs, and accounting principles generally accepted in countries in which the accompanying consolidated financial statements are to be distributed and International Financial Reporting Standards (“IFRS”) have not been quantified in the accompanying consolidated financial statements. Accordingly, these consolidated financial statements are not intended to present the financial position, results of operations and changes in financial position and cash flows in accordance with the accounting principles generally accepted in such countries and IFRS.

II. EXPLANATIONS ON THE STRATEGY OF USING FINANCIAL INSTRUMENTS AND FOREIGN CURRENCY TRANSACTIONS

Main activity of the Parent Bank comprises banking services, such as; launching all kinds of cash and non-cash loans in terms of Turkish Lira and foreign currencies, performing transactions in local, international money and capital markets, supporting agricultural sector financially and collecting deposits in Turkish Lira and foreign currencies. The Parent Bank’s main funding source is Turkish Lira deposits, repurchase agreements, issued securities, and shareholders’ equity. The Parent Bank directs these funds to assets with high return and low risk. These assets include predominantly domestic government bonds and loans. The Parent Bank’s liquidity structure covers the financing of all liabilities at due date. Although most of the sources in the Parent Bank’s balance sheet are with fixed interest rate, some of the securities in assets have floating interest rate. Since the remaining time to re-pricing date of sources is short, cost of sources is repriced in short periods based on the market conditions. Moreover, the Parent Bank adopts high return principle for its long-term placements.

Loans and securities are instruments from which the Parent Bank gets returns above the average returns within its lines of activity. Letter of guarantees, bank loans, commercial letter of credits, repayment commitments for cheques and commitments for credit card limits are the most important risk areas within the off-balance sheet accounts.

Since the Parent Bank’s total debt to the market is low among its total liabilities, the Parent Bank can borrow easily from short-term markets, such as; Borsa Istanbul (“BIST”), Central Bank of the Republic of Turkey, Money Market or Interbank Money Market in case of need. In case of a liquidity crisis, the deposit base of the Bank is not presumed to be significantly affected from such a case since the Parent Bank is a public bank with an extensive branch network.

Cost and return of foreign currency assets are subject to a close follow up. Positive margin of profit is sustained by adjusting deposit interest rates in line with the market interest rates.

Foreign currency operations are recognized at transaction date and valued by Parent Bank’s prevailing counter currency buying rate. At period ends, foreign currency asset and liability balances are valued at the Parent Bank’s period end counter currency buying rates and translated to Turkish currency and the resulting exchange differences are recognized as a “Foreign exchange gain or loss”.

Foreign currency capital amounts transferred to the equity participations operating abroad are evaluated and presented on the financial statements with the exchange rate on the date of the transfer.

Assets and liabilities and income statement items of the abroad branches of the Parent Bank are translated into Turkish Lira with the Bank’s prevailing counter currency buying rates at the balance sheet date.

III. EXPLANATIONS ON INVESTMENTS IN ASSOCIATES, SUBSIDIARIES AND JOINT VENTURES

a. Consolidation principles applied:

The consolidated financial statements have been prepared in accordance with the procedures listed in the “Communiqués related to the Regulation on the Preparation of the Consolidated Financial Statements of Banks” published in the Official Gazette No. 26340 dated 8 November 2006 and the “Consolidated Financial Statements” (“TFRS 10”).

1. Consolidation principles for subsidiaries:

Subsidiaries (including special purpose entity) are all entities, in which the Group has power to control the financial and operating policies for the benefit of the Parent Bank, either (a) through the power to exercise more than 50% of the voting rights relating to shares in the companies owned directly and indirectly by itself; or (b) although not having the power to exercise more than 50% of the using rights, otherwise having the power to exercise control over the financial and operating policies.

Control is evident when the Parent Bank owns, either directly or indirectly, the majority of the share capital of the company or owns the privileged shares or owns the right of controlling the operations of the company in accordance with the agreements made with other shareholders or owns the right of appointment or the designation of the majority of the board of directors of the company.

Subsidiaries are consolidated with full consolidation method by considering the outcomes of their activities and the size of their assets and shareholders’ equity in scope of the materiality principle. Financial statements of the related subsidiaries are included in the consolidated financial statements beginning from the date control on their activities are transferred to the Group. Where necessary, accounting policies of subsidiaries have been changed to ensure consistency with the policies adopted by the Group.

In accordance with the full consolidation method, balance sheet, income statement and off balance sheet items of the subsidiaries have been consolidated line by line with the balance sheet, income statement and off balance sheet of the Parent Bank. The book value of the investments of the Group in each subsidiary has been netted off with the portion of each subsidiary’s capital that belongs to the Group. Unrealized gains and losses and balances resulting from the transactions among the subsidiaries included in consolidation have been eliminated. In order to determine the net income of the Group, minority shares in the net income of the consolidated subsidiaries have been identified and deducted from the net income of the subsidiary. In the consolidated balance sheet, minority shares have been presented separately from the liabilities and the shares of the Group shareholders. Also, in the income statement, minority shares have been presented separately.

The subsidiaries included in consolidation, their title, their place of incorporation, their main activities and their effective shareholding rates are as follows:

EXPLANATIONS ON ACCOUNTING POLICIES (Continued)

**III. EXPLANATIONS ON INVESTMENTS IN ASSOCIATES, SUBSIDIARIES AND JOINT VENTURES
(Continued)**

a. Consolidation principles applied (Continued):

2. Consolidation principles of associates and joint ventures:

An Associate is a partnership with which the Parent Bank participates in its capital and has significant effect on it although it has no capital or management control, whose main operation is banking and which operates according to special legislation with permission and license and is established abroad. The related associate is consolidated with equity method in accordance with materiality principle.

Significant effect refers to the participation power on the constitution of the financial and management policies of the participated associate. If the Parent Bank has 10% or more voting right on the associate, as long as it is not proved otherwise, it will be accepted that the Parent Bank has significant effect on that associate.

Equity method is an accounting method which foresees the increase or decrease of the book value of capital share in an associate from the changed amount in the associate participating shareholder’s equity during the period by the portion of the participant and the deduction of the dividend from the associate from the changed value of the associate amount.

The associates and joint ventures consolidated with the equity method, their title, their place of incorporation, their main activities and their effective shareholding rates are as follows:

Title	Address (City/Country)	Main Activities	31 December 2016		31 December 2015	
			Parent Bank’s Share Percentage (%)	Parent Bank’s Risk Group Share Percentage (%)	Parent Bank’s Share Percentage (%)	Parent Bank’s Risk Group Share Percentage (%)
Türkmen Turkish Joint Stock Commercial Bank	Ashkhabad/Turkmenistan	Banking	50,00	50,00	50,00	50,00
UTBANK JSC	Tashkent/Uzbekistan	Banking	50,00	50,00	50,00	50,00
Arap Türk Bankası A.Ş.	Istanbul/Turkey	Banking	15,43	15,43	15,43	15,43

3. Principles applied during share transfer, merger and acquisition: None.

4. Transactions with minority shareholders:

The Group considers transactions with minority shareholders as transactions within the Group. For acquisitions from minority shareholders, the difference between the acquisition cost and related portion of net assets⁷ booked value is deducted from equity. Profit or loss resulting from sales to minority shareholders is booked under equity.

b. Presentation of unconsolidated subsidiaries and associates in consolidated financial statements:

Turkish Lira denominated unconsolidated associates and subsidiaries are booked at cost value after clarifying the impairment if any, in accordance with “Consolidated Financial Statements” (“TFRS 10”) are recognized in the consolidated financial statements.

When the cost of investments, associates and share certificates which are classified under available for sale portfolio is higher than the net realizable value, the carrying amount is reduced to the net realizable or fair value if any, considering whether the value decrease is temporary or permanent and the ratio of the value decrease.

EXPLANATIONS ON ACCOUNTING POLICIES (Continued)

IV. EXPLANATIONS ON FORWARD TRANSACTIONS, OPTION CONTRACT and DERIVATIVE INSTRUMENTS

The Bank’s derivative transactions mostly include cross currency swaps, currency and precious metal swaps, long term financing operations, full indemnity options and foreign currency forward contracts. The Bank has no embedded derivative instruments separated from the articles of association.

The derivative instruments of the Parent Bank are classified as trading or hedging instruments in accordance with Turkish Accounting Standard on TAS 39 “Financial Instruments: Recognition and Measurement”. The Parent Bank has no derivative instruments for hedging purposes as of the balance sheet date. Accordingly, the Parent Bank is not subject to conditions whether derivative instruments do not meet the determination criteria for being classified as hedging instruments or whether such derivative transactions are finalized through sale, term expiry or fulfillment of obligations under the contract.

Derivative instruments are recognized at fair value on contractual date and subsequently re-valued at their fair values and associated with the income statement. If the fair value of derivative financial instruments is positive, it is disclosed under the main account “Financial Assets at Fair Value Through Profit or Loss” in “Trading Derivative Financial Assets” and if the fair value difference is negative, it is disclosed under “Financial Liabilities at Fair Value Through Profit or Loss” in “Trading Derivative Financial Liabilities”. Fair value changes are recorded under “Derivative Financial Transactions Gains/Losses” in income statement.

The fair values of the derivative financial instruments are calculated using quoted market prices or by using discounted cash flow models.

Liabilities and receivables arising from the derivative instruments are followed in the off-balance sheet accounts from their contractual values.

V. EXPLANATIONS ON INTEREST INCOME AND EXPENSE

Interest income and expenses are recognized on an accrual basis using the internal rate of return method in conformity with TAS 39 “Financial Instruments: Recognition and Measurement”. In accordance with the Communiqué on “Methods and Principles on Determining the Nature of Loans and Other Receivables and Allocation of Provisions” came into force after being published in the Official Gazette numbered 26333 dated 1 November 2006, no interest accrual is calculated for non-performing loans. Realized interest accruals calculated for non-performing loans and recognized as income although not collected are reversed and interest income related to these loans is recognized as interest income only when they are collected.

VI. EXPLANATIONS ON FEE AND COMMISSION INCOME AND EXPENSE

Commission income from banking, agency and intermediary services is recognized as income on the date they are collected. Whereas, commission income from individual, corporate and entrepreneurial cash loans are recognized on an accrual basis by using internal rate of return method and transferred to the income statement in accordance with the matching principle. Other fees and commission expenses are recorded as expense on the date they are paid.

VII. EXPLANATIONS ON FINANCIAL ASSETS

Financial instruments comprise financial assets and liabilities and derivative instruments. They are included in the balance sheet of the Group, if the Group is a legal party to these instruments.

Financial assets mainly constitute the Group’s commercial activities and operations. These instruments have the ability to expose, affect and diminish the liquidity, credit and interest rate risks in the financial statements.

Financial assets are classified as investments held-to-maturity, bank loans and receivables, financial assets available for sale or held-for-trading at initial recognition.

Sale and purchase transactions of financial assets are accounted for using the settlement date basis.

EXPLANATIONS ON ACCOUNTING POLICIES (Continued)

VII. EXPLANATIONS ON FINANCIAL ASSETS (Continued)

a. Financial assets at fair value through profit or loss:

In Group, financial assets, which are classified as “financial assets at fair value through profit or loss”, are trading financial assets and are either acquired for generating profit from short-term fluctuations in the price or dealer’s margin, or are the financial assets included in a portfolio in which a pattern of short-term profit making exists independent from the acquisition purpose.

Trading securities are initially recognized at cost. The cost of the securities is recognized as fair value. Subsequently, trading securities are carried at fair value in the financial statements.

Government bonds and treasury bills included in held for trading and available for sale portfolios traded in BIST are carried at weighted average exchange prices of BIST as of the balance sheet date and those securities that are not traded in BIST are carried at prices of the Central Bank of the Republic of Turkey. Eurobonds are carried at prices in the over the counter markets. The positive difference between the cost and fair value of held for trading securities is accounted under “Other Interest and Income Accrual” and the negative difference is accounted under “Impairment Loss for Marketable Securities” account. The positive difference between the cost and amortized cost is accounted under “Interest income” account; the negative difference is accounted as impairment loss. The positive difference between the fair value and amortized cost is accounted under “Profit from Capital Market Operations” account and the negative difference is accounted under “Loss from Capital Market Operations” account.

b. Held-to-maturity financial assets:

Investments held to maturity include financial assets other than bank loans and receivables and those where there is an intention of holding until maturity and the relevant conditions for fulfillment of such intention, including the funding ability, and where there are fixed or determinable payments with fixed maturity. Marketable securities classified as Financial Assets Held to Maturity may subject to exchange-repurchase bids or refundment transactions within the scope of early redemption.

Investments held to maturity are subsequently measured at amortized cost with internal rate of return, and they are accounted by setting forth provision for impairment loss (impairment loss expense) or by posting interest income accrual.

There are not any financial assets that are previously classified as investments held-to-maturity but prohibited to be classified in this portfolio for two years because of incompliance with the principles of financial assets classification.

Interests received from investments held to maturity are recognized as an interest income.

Held to maturity assets are initially recognized at cost value.

c. Loans and receivables:

The Parent Bank loans and receivables represent financial assets other than those held for trading or held for sale in a short period generated through providing cash, assets or rendering services to the debtor.

The loans and receivables originated by the Parent Bank are initially carried at cost value. Bank loans are measured at amortized cost with internal rate of return. Short-term and long-term loans are grouped as open or guaranteed; FC loans are recognized with fixed price and at period-ends revalued by the counter foreign exchange buying rate of the Bank. Foreign exchange indexed loans are used as TL by the valid counter foreign exchange buying rate of the Bank at usage date. Repayments of these loans are collected as calculated TL value by the valid counter foreign exchange selling rate of Bank at installment date.

EXPLANATIONS ON ACCOUNTING POLICIES (Continued)

VII. EXPLANATIONS ON FINANCIAL ASSETS (Continued)

The Group sets specific and general provisions for loans and other receivables in accordance with the regulations stated by the Communiqué published on the Official Gazette numbered 26333 and dated 1 November 2006 on “Methods and Principles on Determining the Nature of Loans and Other Receivables and Allocation of Provisions”. In addition to this, in the related Regulation and interpretations of BRSA does not include any clause which prevents to reflect excess provisions than the required level. Allocated provisions are deducted from the income for the period. If the receivables for which provisions were set in the previous years are collected, provision for allowances are released and recognized as income under “Other Operating Income” account. Releases of current period provisions are made by the reversal of the amount from the “Provision for Impairment of Loans and Other Receivables” account.

d. Available-for-sale financial assets:

Available-for-sale financial assets are defined as financial assets other than the ones classified as “loans and receivables”, “held-to-maturity assets” or “financial assets at fair value through profit or loss”.

Available for sale assets are initially recognized at cost value. The cost of the securities is recognized as fair value.

Available-for-sale financial assets are subsequently re-measured at fair value in financial statements.

The difference between fair value and cost of available for sale financial assets is booked as interest income accruals or impairment provision. Furthermore, amortized cost using the effective interest method and cost value is compared and the difference is booked as interest income or impairment expense. Fair value and amortized cost of these securities are compared and the difference is recognized in shareholders’ equity as “Marketable Securities Value Increase Fund”. When these financial assets are disposed of or impaired the related fair value differences accumulated in the shareholders’ equity are transferred to the income statement.

When there is no price quotation in an active market for price formations to constitute the basis of the fair value or in such a situation when the reasonable value is not measured confidentially; the fair value of the available-for-sale financial assets are carried at amortised cost using the effective interest method or appropriate valuation methods.

Regarding the banking operations of Ziraat Bank, there exist ineffective shares of Kredi Garanti Fonu, Central Bank of the Republic of Turkey and Milli Reasürans T.A.Ş. The related investments are classified under available-for-sale financial assets and are carried out at book value. The reason to explain the necessary action is the inability to reliably measure the subject asset type at fair value.

EXPLANATIONS ON ACCOUNTING POLICIES (Continued)

VIII. EXPLANATIONS ON IMPAIRMENT OF FINANCIAL ASSETS

A financial asset or a group of financial assets is subject to impairment loss only if there is an objective indication that the occurrence of one or more than one event (“loss event”) subsequent to the initial recognition of that asset has an effect on the reliable estimate of the expected future cash flows of the related financial asset and asset group.

If revalued amounts of financial assets at fair value through profit/loss is less than the prior revalued amounts, initially, value of prior records regarding the value increase are adjusted according to the recent value and if the impairment loss is more than the prior value increase, difference is reflected to “Impairment Expense for Marketable Securities”. If there is an increase in value, initially recognized impairment loss is reversed.

If financial assets available for sale are subject to permanent impairment, the amount is charged to “Impairment Expense for Marketable Securities” account in accordance with the related Turkish Accounting Standard.

If subsidiaries, associates, entities under common control and assets held to maturity are subject to permanent impairment, the amount is charged to “Impairment Expenses for Subsidiaries, Associates, and Assets Held to Maturity”.

The principles for the accounting of provisions for loans and receivables are explained in detail in Note VII. of this section.

Loans and other receivables are classified by the Parent Bank in accordance with the Communiqué on “Methods and Principles on Determining the Nature of Loans and Other Receivables and Allocation of Provisions” published in the Official Gazette numbered 26333 and dated 1 November 2006.

IX. EXPLANATIONS ON OFFSETTING FINANCIAL ASSETS AND LIABILITIES

Financial assets and liabilities shall be offset and the net amount presented in the balance sheet when, and only when the Parent Bank currently has a legally enforceable right to set off the recognized amounts or intends either to collect/settle on a net basis or to realize the asset and settle the liability simultaneously.

X. EXPLANATIONS ON SALES AND REPURCHASE AGREEMENTS AND SECURITIES LENDING TRANSACTIONS

Securities subject to repurchase agreements are classified in “held for trading”, “available for sale” and/or “held-to-maturity” portfolios and they are valued based on the revaluation principles of the related portfolios. Funds obtained by these agreements are followed under the “Funds from Repurchase Agreements” account in the balance sheet and interest expense accrual is calculated using the internal rate of return method.

Funds given against securities purchased under agreements (“Reverse Repo”) to resell are accounted under “Receivables from Reverse Repurchase Agreements” on the balance sheet and interest income accrual is calculated using internal rate of return method.

As of the balance sheet date, there are no securities lending transactions.

EXPLANATIONS ON ACCOUNTING POLICIES (Continued)

XI. INFORMATION ON ASSETS HELD FOR SALE AND RELATED TO DISCONTINUED OPERATIONS AND EXPLANATIONS ON LIABILITIES RELATED WITH THESE ASSETS

Parent Bank’s tangible assets acquired in consideration of receivables are accounted for in accordance with the requirements of the Communiqué on “Methods, Principles for Purchase and Sale of Precious Metal and Sale of Goods and Immovables Obtained in Return of Receivables” published in the Official Gazette numbered 26333 and dated 1 November 2006 and these assets are subject to revaluation by no means.

A discontinued operation is a part of the Parent Bank’s business classified as sold or held-for-sale. The operating results of the discontinued operations are disclosed separately in the income statement.

The Parent Bank has no discontinued operations.

XII. EXPLANATIONS ON GOODWILL AND OTHER INTANGIBLE ASSETS

As at the balance sheet date, the Group has no goodwill.

Other intangible assets are measured at cost on initial recognition and any directly attributable costs of setting the asset to work for its intended use are included in the initial measurement. Subsequently, intangible assets are carried at historical costs after the deduction of accumulated depreciation and the provision for value decreases.

Other intangible assets are amortized by using the straight line method based on their useful lives. Useful lives of other intangible assets are determined by the consideration of items as; useful life of asset, maintenance costs incurred to obtain expected economic benefit from assets and technical, technological or any other type of obsolescence. Amortization method used in the current period is not subject to any change. Depreciation period is 5 years (20% annual depreciation rate) for establishment/formation expenses for other intangible assets with uncertain leasing period or leasing period over 5 years and depreciation rate is proportional with period for those with certain leasing period.

The Group recognizes its software costs incurred under the intangible assets-intangible rights account and the expenses that do qualify as development are added to software’s initial costs and amortized over 3 years considering the useful lives. The Parent Bank has determined estimated useful lives of the intangible assets between 3 and 15 years and it applies depreciation rates between 6,67% to 33,3 %.

XIII. EXPLANATIONS ON PROPERTY AND EQUIPMENT

Property and equipment is measured at its cost when initially recognised and any directly attributable costs of setting the asset in working order for its intended use are included in the initial measurement.. As of 31 January 2014 the Bank has changed its accounting policies and has decided to pursue the real estates registered in its portfolio at fair values. In this context, for all real estates registered in the Parent Bank’s inventory, appraisal study was carried by independent expertise companies, and from 1 January 2014 valuation results are reflected in the accounting records. As a result of the fair valuation of the real estates which is included in tangible fixed assets, TL 4.177.866 revaluation difference is followed under shareholders’ equity as of 31 December 2016. As of 30 January 2014, the net book amount of real estates of the tangible assets before valuation was TL 816.950.

Property, plant and equipment (except for immovable assets) are presented in the financial statements over their remaining cost after deducting accumulated depreciation from cost amounts, if any, and after deducting accumulated depreciation from their fair values. Tangibles are depreciated over their estimated useful lives using the straight-line method. The amortization method applied in the current period has not been changed.

EXPLANATIONS ON ACCOUNTING POLICIES (Continued)

XIII. EXPLANATIONS ON PROPERTY AND EQUIPMENT (Continued)

Estimated depreciation rates of tangible fixed assets are as follows;

Buildings	: 2%
Vehicles and Fixtures	: 2 - 20%

Gains or losses emerging from the disposal of tangible assets are recognized in the profit or loss account as difference between net revenue of a related intangible asset and its net book value.

Ordinary maintenance and repair expenses of tangible fixed assets items are recognized as expenses. Investment expenditures that increase the future benefit by enhancing the capacity of tangible assets are capitalized. The investment expenditures include the cost components which are used either to increase the useful life or the capacity of the asset or the quality of the product or to decrease the costs.

There are no mortgages, pledges or similar precautionary measures on tangible fixed assets or commitments given for the purchase or any restrictions designated for the use of those tangible fixed assets.

XIV. EXPLANATIONS ON INVESTMENT PROPERTY

Investment properties consist of assets held for rent and / or gain on valuation. The related real estates, which the Group owns, are shown in the attached consolidated financial statements by fair value method within the framework of TAS 40 "Investment Property". Gains and losses arising from changes in fair value of investment properties are recognized in profit or loss when incurred.

XV. EXPLANATIONS ON LEASING TRANSACTIONS

The Group performs financial operations as “Lessor” and “Lessee”.

a. Accounting of leasing transactions for the lessee:

Financial Lease

The Group, as the lessee, recognizes its leasing operations in accordance with the requirements of TAS 17 “Leases”. Fixed assets that are acquired under financial leasing are amortized with respect to the rates used for directly acquired assets that have similar nature. Assets held under financial leases are recognized under the tangible fixed assets account and are depreciated on annual and monthly basis with respect to their useful lives. Principal and installment paid for tangible fixed assets that are acquired under financial leasing are charged to liability account “Finance Lease Payable”, whereas interests are recognized in “Deferred Financial Leasing Expenses” account. At installment payments, principal and interest amount of installment amount are debited to “Financial Lease Payable” account, whereas interest is credited in “Deferred Financial Leasing Expenses” account and recorded to the “Other Interest Expenses”.

The Parent Bank does not perform financial operations as “Lessor”.

Operational Lease

Leases, in which the majority of risk and return of property belongs to lessor, are classified as operating lease. Payments that are made as operating leases are accounted in income statements with linear method during the lease period.

b. Accounting of leasing transactions for lessor:

Subject to financial leasing in the consolidated balance sheet of the entity is shown as a receivable equal to net leasing. The interest income is determined so as to form a fixed revenue return ratio using net investment method related to lease asset of the lessor, and the portion of interest income which does not take part in the related term is followed under the unearned interest income account.

XVI. EXPLANATIONS ON PROVISIONS, CONTINGENT ASSET AND LIABILITIES

Provisions other than the specific and general provisions set for loans and other receivables and provisory liabilities are accounted in accordance with TAS 37 “Turkish Accounting Standard on Provisions, Contingent Liabilities and Contingent Assets Corresponding”.

The Group provides provision in case of an existing liability (legal or implicit) as a result of an incident that took place in the past, there is possibility of disposal of assets that bring economic benefit and the liability is measurable. When a reliable estimate of the amount of obligation from The Parent Bank cannot be made, it is considered that a “contingent” liability exists and it is disclosed in the related notes to the financial statements.

For transactions that can affect financial structure, provisions are provided by using the existing data if they are accurate, otherwise by using the estimates.

As of the balance sheet date, there are no probable contingent liabilities resulting from past events whose amount can be reliably measured.

Contingent assets usually arise from unplanned or other unexpected events that give rise to the possibility of an inflow of economic benefits to the entity. Contingent assets are not recognized in financial statements since this may result in the recognition of income that may never be realized. Contingent assets are disclosed where an inflow of economic benefits is probable. Contingent assets are assessed continually to ensure that developments are appropriately reflected in the financial statements. If it has become virtually certain that an inflow of economic benefits will arise, the asset and the related income are recognized in the financial statements in which the change occurs.

XVII. EXPLANATIONS ON OBLIGATIONS RELATED TO EMPLOYEE RIGHTS

a. Employment Termination and Vacation Benefits

The Parent Bank recognizes its liabilities of employment terminations and vacation benefits in accordance with TAS 19 “Employee Benefits” and estimates the net present value of future liabilities arising from employment terminations and vacation benefits and reflects this provision amount in the financial statements.

Under the Turkish legislation as supplemented by union agreements, Employment Termination Benefit payments are made in case of retirement or employment termination or resignation depending on the arise of the legal conditions. According to the related legislation, depending on the status and position of the employee in the Bank and social security institution, Employment Termination Benefit Provision is calculated based on the final salary at the date of retirement or leave (to the extent that the payments and/or salary amount does not exceed the Employment Termination Benefit Provision ceiling).

The Parent Bank uses independent actuaries in determining liability, and also makes assumptions relating to the discount rate, future salary increases, and the employee turnover. These assumptions are reviewed on an annual basis. Retirement benefit obligation is TL 695.237 as of 31 December 2016. (31 December 2015: TL 689.727)

	Current Period	Prior Period
Discount rate (%)	11,40	10,70
Expected Inflation rate (%)	8,00	7,00

XVII. EXPLANATIONS ON OBLIGATIONS RELATED TO EMPLOYEE RIGHTS (Continued)

Communiqué on “Turkish Accounting Standard (TAS19) about Benefits for Employee (No:9)” published in Official Gazette by Public Oversight Accounting and Auditing Standards Authority (“POA”) on 12 March 2013 numbered 28585, was entered into force for the account periods starting after 31 December 2012 on accounting treatment of actuarial profit and loss resulting from changes in actuarial assumptions or differences between actual and actuarial assumptions. After the deferred tax effect, the Parent Bank classified the actuarial loss of TL 78.342 as "Other Comprehensive Expenses" in financial statements. (31 December 2015: TL 85.078 actuarial loss).

In every year the unused vacation liability is calculated based on number of unused vacation days which is calculated by subtracting cumulative summation of used vacation days of all personnel from legally deserved vacation days.

The Parent Bank is not employing its personnel by means of limited-period contracts.

b. Liability of T.C Ziraat Bankası and T. Halk Bankası Members Pension and Relief Fund (TZHEMSAN)

Some of the Parent Bank’s personnel are the members of T.C. Ziraat Bankası and T. Halk Bankası A.Ş. Employees’ Pension Fund (“Fund”) which was established by 20th provisional article of Social Security Law Act numbered 506. As of 31 December 2016 the number of personnel who benefit from the Fund, excluding dependents is 22.221 (31 December 2015: 21.347). 18.450 of these members are active while 3.771 are passive members. (31 December 2015: 17.644 active members, 3.703 passive members).

In accordance with 23rd provisional clause of the Banking Law numbered 5411, the pension fund established within Social Security Law is expected to be transferred to the Social Security Institution by three years following the declaration of the Banking Law numbered 5411. Procedures and principles of the transfer are determined by the decision of Council of Ministers numbered 2006/11345 dated 30 November 2006. However, the 1st paragraph of the 1st article of the 23rd provisional clause of Banking Law numbered 5411 allowing pension funds to be transferred to Social Security Institution (“SSI”) is annulled following the resolution of Constitutional Court declared in the Official Gazette dated 31 March 2007 numbered 26479 E.2005/139, K.2007/13 and K.2007/33.

With the publication of the reasoning of the decision, the Grand National Assembly of Turkey (“GNAT”) started to work on new legal arrangements regarding the transfer of the fund members to SSI and the related articles of the “Law Regarding the Changes in Social Insurance and General Health Insurance Law and Other Related Laws and Regulations” No 5754 (“the New Law”) regulating the transfer of the funds were approved by the GNAT on 17 April 2008. The New Law was published in the Official Gazette dated 8 May 2008, numbered 26870 and came into force.

According to the new law bank pension funds participants and salaried members or the rightful owners would be transferred to Social Security Institution and would be subject to its legislation within three years beginning from the date of publication without any required transaction. Three years transfer period would be extended by two years at most with the decision of Council of Ministers. In accordance with the related legislation, as of the transfer date, the cash value of the liabilities will be calculated by considering the income and expenses of the transferred funds by the insurance branches and by using the actuarial interest rate of 9,80%. Moreover, the unfulfilled other social rights and payments existed in the settlement deeds of the subjected pension funds of the transferred participants, members or the rightful owners will be continued to be fulfilled by the employer entities of the funds and its participants.

In accordance with 58th article and 7th provisional article of the Banking Law, restricting banks from transferring any funds to the pension funds in order to compensate the actuarial deficits effective from 1 January 2008, has been delayed up to 5 years.

XVII. EXPLANATIONS ON OBLIGATIONS RELATED TO EMPLOYEE RIGHTS (Continued)

Based on the Council of Ministers’ decree numbered 2011/1559 and issued in the Official Gazette numbered 27900, dated 9 April 2011, and 20th provisional article of law numbered 506, the deadline for transferring banks, insurance and reinsurance companies, chambers of commerce, chambers of industry, exchange markets and the participants of the funds that were founded for the personnel constituting these entities and the ones having salary or income and the right holders of them to Social Security Institution has been extended for two years.

Besides, the phrase of “two years” in Clause (2), Article 1 of the temporary 20th provision of the law numbered 5510 is revised as “four years” with the law numbered 6283 amending on the Social Insurance and General Health Insurance Law, published in the Official Gazette numbered 28227, dated 8 March 2012.

Based on the Council of Ministers’ decree numbered 2014/6042 and issued in the Official Gazette numbered 28987 dated 30 April 2014, the participants of the funds that were founded for the personnel constituting these entities and the ones having salary or income and the right holders of them to Social Security Institution has been extended for one year.

Lastly, 51st article of Law No.6645 dated 23 April 2015, published on Official Gazette and the first paragraph of the transient 20th article of Law No.5510 related to the transfer of Bank and Insurance Funds to Social Security Institution; “Council of Ministers is the authority to determine the date of transfer of banks, insurance and reinsurance companies, boards of trade, chambers of industry and stock markets or the participants of funds established for their constitute union personnel and the ones that were endowed salary or income and their beneficiaries within the scope of transient 20th article of Law No.506. As from the transfer date, the participants are considered as insured within the scope of clause (a), first paragraph and 4th article of this Law.

The technical balance sheet report as of 31 December 2016 which is prepared in accordance with the new law and the rate determined as 9,80%, concluded no technical deficit arises in the above mentioned fund. Since the Parent Bank has no legal right to hold the present value of any economic benefits available in the form of refunds from Pension Fund or reductions in future contributions to Pension Fund, no asset is recognized in the Bank’s financial statements.

XVIII. EXPLANATIONS ON TAXATION

a. Current Tax

Turkish Tax Legislation does not permit the Parent Bank to file tax return over consolidated subsidiaries financial statements. Therefore, tax provisions which reflected to consolidated financial statements have been calculated per company.

Corporate Tax Law No. 5520 was taken into effect after being published in the Official Gazette dated 21 June 2006 No.26205. Many clauses of the “New Tax Law” are effective from 1 January 2006. According to the New Tax Law, the corporate tax rate in Turkey is payable at the rate of 20% as of 1 January 2006. The corporate tax rate is calculated on the total income of the Bank after adjusting for certain disallowable expenses, exempt income (like affiliation privilege) and other allowances. No further tax is payable unless the profit is distributed.

Dividends paid to non-resident corporations, which have a place of business or permanent attorney in Turkey or to resident corporations are not subject to withholding tax. Otherwise, dividends paid are subject to withholding tax at the rate of 15%. An increase in capital via issuing bonus shares is not considered as profit distribution and no withholding tax incurs in such a case.

XVIII. EXPLANATIONS ON TAXATION (Continued)

Corporations are required to pay advance corporate tax quarterly at a rate of 20% on their corporate income. Advance tax is declared by the 14th and paid by the 17th day of the second month following each calendar quarter end. Advance tax paid by corporations for the current period is credited against the annual corporation tax calculated on the annual corporate income in the following year. Despite the offset, if there is temporary prepaid tax remaining, this balance can be refunded or used to offset any other financial liabilities to the government.

A 75% portion of the capital gains derived from the sale of equity investments and immovable properties held for at least two years is tax exempt, if such gains are added to paid-in capital in accordance with Corporate Tax Law or held in a special account under shareholder's equity for five years.

Under the Turkish Corporate Tax Law, losses can be carried forward to offset against future taxable income for up to five years. Losses cannot be carried back to offset profits from previous periods.

In Turkey, there is no procedure for a final and definitive agreement on tax assessments with tax authorities. Tax returns are required to be filled and delivered to the related tax office until the evening of the 25th of the fourth month following the balance sheet date and the accrued tax is paid until the end of the same month. Tax returns are open for 5 years from the beginning of the year following the balance sheet date and during this period the tax authorities have the right to audit tax returns, and the related accounting records on which they are based, and may issue re-assessments based on their findings.

Tax rates used in tax calculation considering the related countries' tax legislation as of 31 December 2016 are presented below:

Russia	20,00%
Kazakhstan	20,00%
Germany	15,00%
Bosnia Herzegovina	10,00%
Azerbaijan	20,00%
Montenegro	9,00%

b. Deferred tax

In accordance with TAS 12 " Turkish Accounting Standards Relating to Income Tax", the Parent Bank calculates and recognizes deferred tax for temporary differences between the bases calculated based on the accounting policies used and valuation principles and that calculated under the tax legislation.

Deferred tax is recognized on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit, and are accounted for using the balance sheet liability method. Deferred tax liabilities are generally recognized for all taxable temporary differences. However, deferred tax assets are recognized for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilized. Such assets and liabilities are not recognized as deferred tax liability or asset if the temporary difference arises from goodwill or from the initial recognition of other assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

The carrying amount of a deferred tax asset is audited at each balance sheet date. Carrying amount of a deferred tax asset can be reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to be applied in the period in which the liability is settled or the asset realized and reflected in the statement of income as expense or income. Moreover, if the deferred tax is related with items directly recorded under the equity in the same or different period, deferred tax is associated directly with equity.

Deferred tax asset and deferred tax liability are presented as net in these financial statements through offsetting them on individual financial statements of consolidated subsidiaries.

The deferred tax benefit is not taken into account in profit distribution in accordance with the relevant circular of BRSA.

XIX. EXPLANATIONS ON INSURANCE TECHNICAL RESERVES

Technical Reserves

Reserve for unearned premiums:

Reserve for unearned premiums consists of the part of the premiums accrued for the insurance contracts in force without gaining any commission or other deductions and remaining on the gross basis on the day of the next accounting period or accounting period.

Unexpired risk provision:

Within the framework of Regulation on Technical Reserves, insurance companies are required to account for an unexpired risk reserve against the probability that, future losses incurred from in force policies may exceed the unearned premium reserve accounted for the related policies considering expected ratios. Expected loss ratio is calculated by dividing the current year incurred losses to current year earned premiums. In accordance with “the circular about the Change of Unexpired Risks Reserve Calculation” numbered 2012/15 published by Treasury, if the loss ratio for a branch is higher than 95%, net unexpired risk reserve for that branch is calculated by multiplying the ratio in excess of 95% with net unearned premium reserve for the related branch; and gross unexpired risk reserve for that branch is calculated by multiplying the ratio in excess of 95% with gross unearned premium reserve for the related branch. The difference between gross and net amounts is considered as the reinsurance share.

Reserve for outstanding claims:

Insurance companies provide reserve for outstanding claims, incurred and reported but not yet settled in the current or previous years based on reported balances or estimates when actual balances are not exactly known and incurred but not yet reported claims. Within the calculation of reserve for outstanding claims, incurred and reported but not yet settled, entire shares of expense required for maturation of compensation reports including calculated or estimated expert, referee, consultant, court and communication expenses are taken into account and subrogation, salvage and similar revenue items are not discounted. Incurred subrogation, salvage and similar revenue items whose codes of practice will be determined by the undersecretariat are shown under the related credit account of the asset side of the balance sheet and interrelated with period income in condition that subrogation of rights has been gained.

Offset provision:

In Article 9 of “Communiqué Regarding the Technical Reserves of Insurance and Reinsurance Companies and the Assets that these Reserves Recorded” numbered 27655 dated 28 July 2010, it is stated that insurance companies provide offset provision for loan and earthquake assurances in order to compensate the possible fluctuations in the assurance rates and catastrophic risks in the succeeding accounting periods.

Mathematical provisions:

Mathematical provisions indicate sum of bonus provisions and actuarial mathematical provisions calculated separately according to technical principles in tariff for each agreement in force. Life branch mathematical provision of the company consists of actuarial mathematical provisions calculated for long-term life insurances on credit. Actuarial mathematical provisions are the differences between risk premiums taken for risks undertaken by the Company and cash values of the liabilities to beneficiaries and insureds.

XX. EXPLANATIONS ON BORROWINGS

The Group accounts its debt instruments in accordance with TAS 39 "Financial Instruments: Recognition and Measurement". In the following periods, all financial liabilities are carried at amortized cost by using the internal rate of return method. The Bank has no borrowings that require hedging techniques for accounting and revaluation of debt instruments and liabilities representing the borrowings.

If required, the Parent Bank borrows from domestic and foreign real people and entities with debt instruments such as bill/bond issuance. These transactions are recognized at fair value including acquisition costs at the transaction date while accounted with effective interest rate method over their discounted costs in the following periods.

The Group has issued no convertible bonds and has no instruments representing its own borrowings.

(*) Total capital has been calculated in accordance with the “Regulations regarding to changes on Regulation on Equity of Banks” effective from date 31 March 2016, the information given in the prior period column has been calculated pursuant to former regulation and reflects the information dated 31 December 2015.

a) Information Related to the Components which Subject to Temporary Implementation in the Calculation of Equity:

None.

b) Necessary explanations in order to reach an agreement between the statement of shareholders’s equity and balance-sheet amounts:

The difference between Total Capital and Equity in the consolidated balance sheet mainly arises from the general provision. In the calculation of Total Capital, general provision up to 1,25% credit risk is taken into consideration as Tier II Capital. On the other hand, in the calculation of the Total Capital, improvement costs for operating leases followed under tangible assets in the balance sheet, intangible assets and net book value of immovables that are acquired against overdue receivables and retained more than five years, other items defined by the regulator are taken into consideration as amounts deducted from Total Capital.

(Continued)**

II. EXPLANATIONS ON THE CONSOLIDATED CREDIT RISK

Credit risk is the possibility of loss that the Parent Bank may be exposed due to the partial or complete default of the debtor by not complying to the obligations of the agreement made, or due to the decrease in credit worthiness.

The limits of the credit customers are identified, after combined assessment of various factors like the financial and non-financial information of the credit customers, credit requirements, sectoral and geographical features and, in conformity with the legal legislation, in line with the credit authorization limits of the branches, Regional Managements, Group Presidencies, Department Presidencies, Assistant General Management, General Manager, Credit Committee and Board of Directors.

The average limits identified related the credit portfolio are approved by the Board of Directors and revised when required. The identified limits are allocated by related departments on Regional Managements basis by considering the factors like portfolio structure, potentials of the customers and credit, regional and sectoral characteristics, competencies of the personnel.

In order to prevent the risk intensity on the corporate and entrepreneurial loan portfolio, limits are determined and followed on the basis of group companies, private and public firms, and different debtor groups. The Parent Bank’s credit authority limits on given consumer loans are defined with the separation of type and guarantee and these limits are updated according to economic conjuncture and demands of Regional Managements/Branches.

In line with the budgeted targets, TL/FC Cash/Non-Cash/Corporate/ Entrepreneurial loan placements are issued and followed on sectoral and regional basis.

The loans issued by the branches are periodically analyzed on the basis of the limits, subjects, guarantees, maturities, accounts followed, outstanding balances, numbers of the customers, and followed on customer and regional basis.

After the opening of the lines of the corporate/entrepreneurial loans, the firms are continued to be monitored and the changes at the financial structures and market relations of the credit firms are followed. The credit limits are identified and approved for one year and renewed in case of no negative change in the situation of the customer (financial structure, market, guarantee, etc.).

The Parent Bank is assessing credibility of the customer as the essential factor in issuing credits and creditors’ credit worthiness are ascertained during credit application and limit allocation/renewal. Documents to be obtained during the application are evidently mentioned in regulations and appropriateness of the documents obtained during application is controlled by internal audit departments. The Parent Bank considers guarantees as important in minimization and elimination of the risk. As a result of policies and process based on obtaining reliable and robust guarantees, the Parent Bank’s credit risk significantly declines.

On January 2011 the Parent Bank started applying internal ratings processes as a decision support system for analyzing credit worthiness and determining credit allocation for corporate/ entrepreneurial consumer loans.

The Parent Bank is not engaging in credit transactions that are not defined at the legislation and not put into the practice.

The Parent Bank makes provision in conformity with the “Communiqué on Methods and Principles on Determining the Nature of Loans and Other Receivables and Allocation of Provisions”.

Identification of limits for domestic and foreign banks are done by rating which is determined by considering the needs of clients and departments together with financial and economic conditions of the banks and their countries. When banks and/or countries are financially or economically risky, identified limits can be restricted with maturity, amount or type of transaction or use of credit is called off.

Since the Parent Bank’s abroad lending operations have no significant effect on the financial statements, and operations and transactions are diversified via the use of different financial institutions in various countries, the Parent Bank is not believed to be exposed to a significant credit risk as a result of these operations.

II. EXPLANATIONS ON THE CONSOLIDATED CREDIT RISK (Continued)

Foreign financial institution and country risks of the Parent Bank are generally taken on financial institutions and countries which are rated by international rating institutions. Treasury operations are executed in the frame of pre-determined authorization and limits, these authorization and limits are monitored. Client transactions within the context of Fund Management are done in the frame of general loan limits determined for the clients.

The Parent Bank engages in foreign currency swaps and forward transactions considering its asset-liability balance and legal limits. These are not considered to generate material risk given the amount of these transactions in the balance sheet.

In line with the regulation on provisions, if the cash risk of a customer classified as nonperforming, the non-cash is classified as nonperforming under the same group where the cash risks were already followed and specific provision is reserved.

Restructured and rescheduled loans are also booked in line with procedures and under accounts defined by the related regulation. Furthermore, they are monitored by the Parent Bank in line with credit risk policies. In this context, financial situation and commercial operations of related customers are analyzed and in terms of restructured plan, whether principal and interest payments have been paid is being checked and necessary measures are taken.

The percentage of top 100 and top 200 cash loans of the Parent Bank in the total cash loan portfolio is 26% and 31% respectively (31 December 2015: 24% and 29%).

The percentage of top 100 and top 200 non-cash loans of the Parent Bank in the total non-cash loan portfolio is 57% and 67% respectively (31 December 2015: 57% and 68%).

The percentage of top 100 and top 200 cash and non-cash loans of the Parent Bank in the total cash and non-cash loan portfolio is 27% and 34% respectively (31 December 2015: 32% and 38%).

General provision made by the Group for the credit risk is TL 4.042.425 (31 December 2015: TL 2.925.818).

Grades of Fitch Ratings International Rating Agency are used in determining risk weights for risk classes being used rating grade of risk classes indicated in article 6 of Communiqué on "Measurement and Assessment of Capital Adequacy of Banks". Additionally, grades of Fitch Ratings International Rating Agency were used for receivables from central government and central bank of our country and counter parties abroad. Counter parties resident are accepted as "gradeless" and take risk weight suited for "gradeless" category in relevant risk class.

For determination of risk weight regarding items that export or issuer rating not included to purchase/sale accounts is firstly considered to export rating, and also issuer's credit rating is considered in the absence of export rating.

IV. EXPLANATIONS ON THE CONSOLIDATED CURRENCY RISK

- a) **Whether the Parent Bank is exposed to foreign currency risk, whether the effects of this matter are estimated, whether limits for the daily followed positions are determined by the Board of Directors:**

The Parent Bank’s policy is to avoid carrying significant position by means of foreign currency management. Therefore, the Parent Bank is not exposed to significant currency risks. Risks are monitored by the currency risk tables prepared based on the standard method. Besides, VAR (Value at Risk) is calculated for daily foreign exchange position and reported to the related departments. VAR based currency risk limit is also daily followed which was approved by Board of Directors.

Moreover, dealer’s positions and limits for foreign exchange transactions are under the authorization of the Board of Directors.

- b) **Hedge against foreign exchange debt instruments and net foreign exchange investments by hedging derivative instruments, if material:**

None.

- c) **Management policy for foreign currency risk:**

“Liquidity Gap Analysis”, “Reprising Gap Analysis” and “Structural Liquidity Gap Analysis” which takes into account historical reprising rates of foreign currency accounts, are prepared periodically in order to define liquidity and interest rate risks at US Dollar and Euro, which are mainly used by the Parent Bank in its operations. Also, daily VAR analysis for following the currency risk and within the context of legal reporting, Foreign Currency Net General Position/Shareholders’ Equity Ratio and Foreign Currency Liquidity Position are also monitored regularly.

- d) **Current foreign exchange bid rates of the Parent Bank for the last 5 business days prior to the financial statement date:**

**EXPLANATIONS RELATED TO THE FINANCIAL POSITION AND RISK MANAGEMENT OF THE BANK
(Continued)**

**VII. EXPLANATIONS ON THE CONSOLIDATED LIQUIDITY RISK MANAGEMENT AND
CONSOLIDATED LIQUIDITY COVERAGE RATIO (Continued)**

3) Minimum statements concerning liquidity coverage ratio by Banks

a) Important points affecting the results of liquidity coverage ratio and the changes of the considered items in the course of time to calculate this ratio:

Bank deposit, which has not a fluctuant structure, together with constituting an important part of its sources and liquidity coverage ratio, in proportion to other deposits, public deposits can cause periodic changes within total deposits. When comparing with the previous periods, the percentage of the total deposit in financial statement does not change and has an increasing sail.

As well as its low turn into cash ratio, since the non-cash loans have a remarkable extent in proportion to financial statement, they have an influence on the calculation of liquidity coverage ratio. Comparing to previous periods, non-cash loans are tend to increase.

As a guarantee for the repo transactions a portfolio of securities which includes T-Bills and government bonds is being used. The securities which have been used for the repo transactions lose their flexibility. Hence as a result of the usage method of the securities as a guarantee the liquidity coverage ratio is effected.

b) High quality liquid assets are comprised to which items:

All of the high-quality liquid assets of the calculation of Liquidity Coverage Ratio are First Quality Liquid Assets. These; cash, the accounts in Central Bank, reserve requirements and securities from the portfolio (The important part of bonds and T-bills issued by Republic of Turkey Prime Ministry Undersecretariat of Treasury, other bonds).

c) Funds are comprised of which items and their volume in all funds:

The major part of the resources of funds in Bank is comprised of deposits, the remaining is divided according to their share in the balance sheet as repo, borrowings, and issued securities.

d) Information about cash out-flows arising from derivative operations and margin operations likely to processing:

Derivative operations in Bank are carried out on the purpose of protection from the risks that may exist or occur in the balance sheet, liquidity management, or meet customer demand. Customer operations are carried out under the “Framework Agreement on Purchase and Sale of Derivative Instruments” or ISDA (International Swaps and Derivatives Association) and CSA (Credit Support Annex) with additional, as well as operations performed by the banks is performed again ISDA and CSA contracts signed. Operations performed under the said contracts in the determined periods are subject to daily market valuation and additional collateralization as cash. Operations could create additional collateral input or output depending on market valuation.

e) The concentration limits regarding collateral and counterparty and product based fund resources:

For the counterparty and product based concentration limits are determined under “Regulations of Risk Management, Stress Test Program and the Bank’s Internal Capital Adequacy Assessment Process (ICAAP)” with the approval of Senior Management. These limits are followed in particular frequency. Besides, It has reported to the relevant units and Senior Management. There is no excess regarding the limits during operating period.

The Bank’s leverage calculated by force of the regulation “Regulation on Measurement and Assessment of Leverage Ratios of Banks” is 8,00% (31 December 2015: 8,33%). The change on leverage results heavily from the increase on risk amounts of balance sheet assets. The regulation sentenced the minimum leverage as 3%.

IX. EXPLANATIONS ON CONSOLIDATED RISK MANAGEMENT

This section contains notes and explanations regarding the "Communiqué on Disclosures about Risk Management to be Announced to Public by Banks" released by the Banking Regulation and Supervision Agency (BRSA), published in the Official Gazette no. 29511 on 23 October 2015 and became effective as of 31 March 2016.

As part of its controlling activities, the Risk Management Group Presidency conducts controls on Risk Management Explanations. Two different control processes, e.g. Calculation of Capital Adequacy process and other Risk Management processes, are conducted by the relevant unit periodically in line with capital adequacy control points and guidelines as well as control points for other Risk management field of activity and guideline.

Furthermore, as part of legislation compliance controls, compliance of all activities, new transactions and products planned by the Bank with relevant laws, legislation, internal Bank policies and banking practices is controlled. Accordingly, compliance of legislative regulations regarding Risk Management Explanations with internal Bank practices is also controlled.

Controlling activities conducted by the Head Office Units are performed in line with the control periods determined by considering functions of Units and risks they bear, job definitions of the Units and their impact on the Bank's balance sheet. Control processes by the Head Office Units are performed based on control points determined according to process, duties and powers of unit's field of activity and control techniques are elaborated in the head office control guideline.

IX. EXPLANATIONS ON CONSOLIDATED RISK MANAGEMENT(Continued)

1. Explanations on Risk Management and Risk Weighted Amount

a) Bank's Risk Management Approach

i. It has to do with how the business model determines the Bank's risk profile; how it interacts with it (e.g. key risks related to the business model and how each of these risks is reflected on explanations); and how the Bank's risk profile interacts with the risk appetite approved by the board of directors

While risk appetite determines the Bank's risk level, risk capacity determines its risk appetite and, therefore, risk profile. Local and international conjuncture is also considered to determine the risk level. Establishment of forward-looking strategies and policies is also considered in this regard. The Bank's risk level is restricted to the limits consistent with its risk appetite.

Risk limits are determined in accordance with the level of risks that may be assumed by the Bank, its activities, size and complexity of its products and services. The limits are revised and, if needed, updated regularly in line with the developments in market conditions, the Bank's strategy and risk appetite.

Critical thresholds (signal and limit values) indicating that limits are approached due to internal or external developments have been identified. In the event that these values are approached or exceeded, relevant units take required actions.

Parameters regarding signal and limit structure as well as limit values of parameters are determined in coordination with the relevant units and implemented upon approval of the Audit Committee and Board of Directors.

Signal and limit values based on risk weighted assets are monitored by the Bank's Risk Management Group Presidency regularly and actual values are reported periodically to the Bank's Top Management.

ii. Risk management structure: Responsibilities distributed at the Bank (e.g. supervision and delegation of authority); segregation of duties by risk type, business unit, etc.; relations between structures included in risk management processes (e.g. board of directors, top management, separate risk committee, risk management unit, compliance, internal audit function)

The Bank's Top Management and relevant units perform their risk management duties, authorities and responsibilities in line with the relevant legal legislation and internal Bank regulations.

Structure of the Bank's risk management is consistent with the Regulation on Internal Systems and Internal Capital Adequacy Assessment Processes of Banks. Accordingly, internal system units consisting of the Inspection Board Presidency, Internal Control and Compliance Group Presidency and Risk Management Group Presidency report to the Audit Committee and Board of Directors through the Vice President who is responsible for internal systems and operates separate from executive units.

Risk measurement and monitoring activities are conducted as part of risk management and the results are considered in strategic decision-making process by relevant units and bodies. Risk management operations are conducted in accordance with the Regulation on the Internal Systems and Internal Capital Adequacy Assessment Processes of Banks, issued by the BRSA, within the scope of Regulation on Risk Management, Stress Test Program and the Bank's Internal Capital Adequacy Assessment Process (“ICAAP”) approved by the Bank's Board of Directors.

(Continued)**

IX. EXPLANATIONS ON CONSOLIDATED RISK MANAGEMENT(Continued)

Organizational structure of the Bank's Risk Management Group Presidency consists of credit risk management, market risk management, operational risk management and statement risks management units. Duties of risk management:

- Ensuring identification, measurement, reporting, monitoring and control of risks exposed through policies, practices and limits established to monitor, control and revise, when necessary, the risk-return structure of the Bank's cash flows in the future, quality and level of its associated activities
- Conducting stress tests and scenario analyses
- Establishing and maintaining a system that will ensure determination of capital required to cover significant risks exposed or possible risks and assessment of capital adequacy/requirement level in line with the strategic goals
- Preparing ICAAP reports periodically.

ICAAP analyses and activities are validated by a team that reports to the Audit Committee independently from the team that develops and implements the methodology of such activities. The same team issues a Validation Report as well. Analyses and activities conducted within the process, including validation activities are reviewed by the Inspection Board Presidency and a Review Report is issued for the results.

iii. Channels used for disseminating and implementing risk culture within the Bank (e.g. codes of conduct, manuals including operational limits or procedures to be performed when risk thresholds are exceeded, procedures for identifying and sharing risk issues between business units and risk units)

The Bank exercises maximum efforts to perceive both risks and returns accurately during its activities and maintain its perspective for disseminating risk culture across the Bank. Accordingly, goals, vision and strategic approaches are shared in large group meetings held by the Bank's Top Management with employees.

Signal and limit structure established based on risk weighted assets is one of the channels used to disseminate risk culture within the Bank. Parameters for signal and limit structure and limit values of parameters are determined by risk management by consulting the relevant units and approved by the Board of Directors.

It is ensured that risk signal and limit structure is forwarded to relevant units in the Bank and the structure is understood by the staff. Usage levels for signal and risk parameters are subject to reports submitted to the Top Management.

If limits are exceeded, the Bank's Top Management is notified. In such a case, matters such as risk mitigation, risk transfer or risk-averse, increasing collaterals and so on can be considered as part of required actions. If limits are exceeded, forward-looking strategies and policies of the Bank—including budget figures—can be reviewed or, where necessary, revised.

Another channel used to disseminate the risk culture is in the scope of ICAAP activities. It is essential to include assessment results for capital adequacy in the ICAAP Report covering all significant risks of the Bank. The report is prepared in coordination with risk management and with participation from other relevant units. Similarly, the Bank's budget goals for the upcoming years are also established with the participation of relevant units. The Bank's Top Management and relevant units conduct their ICAAP duties, authorities and responsibilities in line with the Bank regulations and relevant legal legislation.

iv. Principal elements and scope of risk measurement systems

The Bank's risk measurement system functions in line with the best practices, legal regulations, fields of activity and product ranges in a consistent, reliable and integrated way. Regarding the inclusion of risk measurement results in decision-making processes, reports are elaborated with extensive explanations and assumptions to avoid any misinterpretation that may arise from errors and deficiencies.

Required activities are performed to engage in design, selection, implementation and pre-approval processes for risk measurement models; review accuracy, reliability and performance of models regularly through various methodologies and make required revisions accordingly; and report results of analyses conducted with such models.

The Bank's capital adequacy ratio is calculated in accordance with the Communiqué on Measurement and Assessment of Capital Adequacy of Banks, Communiqué on Credit Risk Mitigation Techniques and other relevant legal regulations.

Counter parties/operations related to the credit risk are separated on the basis of risk classes mentioned in Appendix-1 of the Communiqué on Measurement and Assessment of Capital Adequacy of Banks, and each of them is assigned by the weight of risk in line with the matters specified for relevant risk class. Then, they are subject to risk mitigation in accordance with the principles of Communiqué on Credit Risk Mitigation Techniques and weighted based on the risk weights.

After deduction of specific provisions in accordance with Communiqué on Methods and Principles for the Determination of Loans and Other Receivables to be Reserved for and Allocation of Reserves, non-cash loans and commitments are included in the calculation of credit-risk-weighted amount with loan conversion rates presented in article 5 of Communiqué on Measurement and Assessment of Capital Adequacy of Banks.

Trading accounts and the values deducted from the capital base in the shareholders' equity computation are excluded from calculation of credit risk-weighted assets.

Calculations regarding to the counter party credit risk are made for repurchase agreement and derivative transactions. These transactions are added to the calculations after applying the rates presented in the amendments of the Communiqué on Measurement and Assessment of Capital Adequacy of Banks and Communiqué on Credit Risk Mitigation Techniques.

Calculations regarding counter parties credit risks are made with the basic financial collateral method and extensive collateral method for banking accounts and trading accounts respectively.

The amount subject to the total market risk is calculated through the standard method. Furthermore, value at risk forecasts are made on a daily basis and backward testing is performed so as to measure performance of the model.

Liquidity Coverage Ratio and Liquidity Risk Analysis reports for the liquidity risk are prepared in accordance with the relevant regulations. Furthermore, stress test is performed to assess maturity mismatch between sources and uses, contractual maturities as well as behavioral maturities of assets and liabilities, the Bank's liquidity requirement in a worst case scenario and relevant damages that may be incurred based on scenario and sensitivity analysis activities.

Control of interest rate risk on banking accounts entails monitoring rate and maturity mismatch between sources and uses of fixed and variable interest rates, contractual maturities as well as behavioral maturities assets and liabilities and the effects of the usual and unusual changes in interest rates which is possibly uptrend and downtrend.

IX. EXPLANATIONS ON CONSOLIDATED RISK MANAGEMENT(Continued)

v. Explanations provided to the board of directors and top management on risk reporting processes, particularly scope and main contents of reporting

It is essential to inform the Top Management about developments and results of the analysis and activities conducted in order to achieve efficiency in risk management. Accordingly, a reporting system for informing Top Management is established and required measures are taken for healthy functioning of the system.

Informing process as part of reporting should be based on the most current data available on a periodical basis. Reports issued contain, at minimum, information on risk amount and development, legal capital requirement, legal ratios for liquidity and interest rate risks, stress test analysis results, effect of such results on capital adequacy level and ratios, realization level of risk limits and limitations, and assumptions of risk measurement method used.

As part of the reporting system, an information systems infrastructure is established for external reporting and required actions are taken to fulfill legal obligations fully in a timely manner in this regard.

vi. Explanations on stress test (e.g. assets subject to stress test, scenarios applied, methodologies used and the use of stress test in risk management)

Stress test is intended to pre-assess the effect of negative developments in specified risk factors on amounts subject to risk and capital adequacy/requirement level.

Conducting the stress test periodically is essential, and test result must be included in internal reporting and considered in strategic decision-making process or capital management. Results of stress test analysis are considered while establishing risk management policies.

In stress test activities, shock is applied to risk factors determined (factors specific to debtor or transaction or macroeconomic variables such as exchange rate, price, interest and so on), and the effects of results on risk-weighted asset amount and capital adequacy ratio are identified. Accordingly, risk factors are identified first and then assumptions to be implemented are determined and possible losses in the future are estimated. Stress test activities include creating scenarios, which are unlikely, if not impossible, and which may affect the Bank's risk level significantly.

The results of stress test are subject to internal Bank reporting and ICAAP Report. The results of stress test may be used in processes to determine the Bank's risk appetite or risk limits and identify new and current business strategies as a planning instrument and their effect on capital utilization.

Analyses of credit risk based on internal and external risk factors, counter party credit risk, liquidity risk, interest rate risk and market risk are conducted in the case of stress tests which are subject to internal reporting.

The Board of Directors is responsible for assessing the results of the Stress Test Program and taking actions based on the results. Accordingly, actions such as revision of risk appetite, strategy and risk limits or restriction of activities to specific sectors or portfolios can be taken.

vii. The Bank's risk management, aversion and mitigation strategies and processes based on business model and monitoring processes for continuous efficiency of safeguards and mitigants

Amounts subject to credit risk can be mitigated by using one or more risk mitigation techniques in line with the legal regulations.

Funded or unfunded credit safeguard instruments are considered while using the risk mitigation technique. Whether credit safeguard instruments meet minimum compulsory conditions specified in legal regulations is checked via the system.

The Bank performs risk mitigation with a simple financial method. Credibilities of guarantors are monitored and assessed in the scope of credit revision maturity.

All Bank employees are responsible for control and mitigation of operational risks based on their job definitions and business processes. All Bank units are obliged to take risk mitigation measures for mitigation of operational risks that may occur in their respective fields of activity through insurance and other risk transfer mechanisms.

IX. EXPLANATIONS ON CONSOLIDATED RISK MANAGEMENT(Continued)

The Bank's market risk is mitigated through derivatives or other financial products by considering current conjuncture and risk appetite, risk capacity and risk level. Long term liabilities are obtained and the interest rate risk arising from liquidity and banking accounts is limited through the transactions performed.

Diversification of resources is deemed important for managing the liquidity risk that may occur. While the Bank's fundamental funding resources are deposits, the strategy of preserving the common base structure of deposits is sustained. Besides, liabilities other than deposits such as bond/bill issuance, repo and credits are deemed important for increasing the fund range and decreasing the maturity gap between assets and liabilities. As for the asset side of the Bank, policies intended to reduce average credit maturity are pursued as part of measures to improve short term cash cycle and minimize maturity mismatch between assets and liabilities. As part of management of interest rate risk, measures are taken to reduce repricing maturity mismatch of interest sensitive assets and liabilities.

2. Credit Risk Explanations

1) General explanations on credit risk

a) General qualitative information on credit risk

i. Transformation of bank's business model into components in credit risk profile

The banks must allocate risk limits approved by board of directors of the banks and monitor limit utilization pursuant to Article 38 of the Regulation on the Internal Systems and Internal Capital Adequacy Assessment Processes of Banks issued by the BRSA and published in the Official Gazette no. 29057 dated 11 July 2014. Furthermore, pursuant to paragraph 5 of the same article, it is expected to establish a signal structure that will serve as an early warning mechanism in addition to the limit structure.

Additionally, principle 5 of the Guideline for Counter Party Credit Risk Management announced to the public by the BRSA with the Agency Decision no. 6827 dated 31 March 2016 states that banks must allocate a limit for counter party credit risk (CCR).

Pursuant to aforementioned regulations, to what extent the Bank gets closer to allocated limits approved by the board of directors or to what extent these levels were exceeded must be monitored by the risk management unit which was structured independent from executive units. This practice that was included in monitoring function of the risk management unit is significant as it presents a legal obligation and it helps optimization of resource utilization.

As part of the variation in customer segmentation due to changing organizational structure of the Bank, credit risk signal and limit parameters were determined on the basis of corporate, entrepreneur and personal segment in line with the customer segment structure and they are updated according to the changes in the segmentation structure. Signal and limit values for counter party credit risk transactions were determined separately for banking accounts and trading accounts based on portfolio type. Calculations were made based on ratio of risk weighted asset amounts calculated for relevant parameters to total credit and market risk weighted asset amounts and they are reported to the Bank's Top Management periodically through relevant units.

IX. EXPLANATIONS ON CONSOLIDATED RISK MANAGEMENT(Continued)

In an attempt to prevent significant effects of unfavorable developments in the portfolio subject to market risk, it is essential to restrict risk level to the limits in line with the Bank's risk appetite. Market risk limits were determined as interest rate risk and currency risk limits. Current values for such limits are calculated on a daily basis with market data and reported to the Bank's Top Management through relevant units. Market risk signal and limit values are monitored dynamically in the light of market developments and, if necessary, updated based on the developments in the Bank's strategy and risk appetite.

ii. Criteria and approach adopted for determining credit risk policy and credit risk limits

As part of credit risk management, the Bank's risk management team conducts the functions of identification, measurement, monitoring and controlling of credit risk in line with the structure, size, complexity and growth rate of products and activities and reports the analysis, including stress test, and its results to the Bank's Top Management.

In an attempt to prevent significant effects of unfavorable developments in the portfolio subject to credit risk, credit risk level was restricted to the limits in line with the Bank's risk appetite. The limits are revised and, if needed, updated regularly in line with the developments in market conditions, the Bank's strategy and risk appetite.

There is a signal and limit structure in place, indicating that credit risk limits are almost reached as a result of internal and external developments. Parameters for signal and limit structure and limit values of parameters are determined by risk management by consulting the relevant units. The approval of Audit Committee and Board of Directors is sought in order to implement parameters and signal/limit threshold values within the Bank. It is ensured that risk signal and limit structure is forwarded to relevant units in the Bank and the structure is understood by the relevant staff. Actual values are monitored closely by the risk management Actual values regarding signal and limit parameters are reported to the Bank's Top Management.

iii. Structure and organization of credit risk management and control function

The Bank's internal system units consist of the Inspection Board Presidency, Internal Control and Compliance Presidency and Risk Management Group Presidency. Credit risk management is one of the four services under the Risk Management Group Presidency.

Activities conducted at the credit risk management unit, which is subject to inspection and controlling activities periodically, aim to establish and maintain a credit risk management infrastructure that is structured enough to meet legal obligations and flexible enough to accommodate the best practices. Accordingly, capital amount that should be reserved for credit risk is calculated; risk mitigation techniques are implemented; stress tests are conducted; credit risk signal and limit structures are monitored; activities are conducted to calculate credit risk with advanced methods and developments that may affect the Bank's credit risk are monitored. Analyses conducted are reported to the Top Management and relevant units periodically.

iv. Relationship between credit risk management, risk control, legal compliance and internal audit functions

Risk Management Group Presidency goes through inspection and control activities periodically. In case of any findings, they are reported and required activities are performed.

Furthermore, inspection and control units involve in the process also for the ICAAP activities that constitute a significant part of risk management activities. Accordingly, ICAAP analyses and activities are validated by Internal Control and Compliance Group Presidency that reports to the Audit Commission independent from the team that develops and implements the methodology of the ICAAP analyses. The same team issues a Validation Report as well. The entire ICAAP process is subject to an inspection by the Inspection Board Presidency and reported through Examination Report issued.

v. Scope and main content for reporting to top management and board members on credit risk management function and credit risk exposed

It is essential to inform the Bank's Top Management about developments in credit risk management and results of the analysis and activities conducted in order to achieve efficiency in risk management. Accordingly, a reporting system for informing the Bank's Top Management on credit risk management is established and required measures are taken for healthy functioning of the system.

Informing process as part of reporting should be based on the most current data available on a periodical basis.

Reports issued contain, at a minimum, information on risk amount and development, legal capital requirement, stress test analysis results, effect of such results on capital adequacy level, realization level of risk limits and limitations and assumptions of risk measurement method used.

d) Additional explanations on credit quality of assets

i. Differences between definitions and explanations of "deferred" receivables and receivables for which "provision was allocated", and definitions of "deferred" and "provision of allocation", if any

The Bank classifies its credits and other receivables and allocates specific and general provisions pursuant to the "Communiqué on Methods and Principles for Determining the Nature of Loans and Other Receivables and Allocation of Provisions" published in the Official Gazette no. 26333 dated 1 November 2006. The term "deferred receivables" is used for credits named "Loans under Close Monitoring" whose maturity is deferred for up to 90 days as of the end of period without any impairments as well as for credits named "Non-performing Loans" whose maturity is deferred for more than 90 days or subject to impairment. In practice, the Bank sets general provisions for credits classified as "Standard Credits" and "Under Close Monitoring" and specific provisions for credits classified as "Non-performing Loans".

ii. The portion that is not considered within the scope of "allocation of provision" among deferred receivables (over 90 days) and reasons for this practice

The Bank transfers credits whose maturity is deferred for more than 90 days automatically to monitoring accounts pursuant to the classification provisions of Regulation on Provisions, and allocates provision of respective class; whereas it does not allocate specific or general provisions for fund-based credits classified as "Non-performing Loans" pursuant to Article 13 "Exceptions" of the Regulation on Provisions as the relevant risk is not assumed by the Bank.

IX. EXPLANATIONS ON CONSOLIDATED RISK MANAGEMENT(Continued)

iii. Definitions of methods used for determining provision amount

Pursuant to provisions of the Regulation on Provisions, the Bank allocates a General Provision of at least one percent (1%) of total standard cash loans and at least two percent (2%) of total cash loans under close monitoring (deferred for less than 90 days) and it calculates general provision by applying general provision rates applicable to cash loans (e.g. 1% for standard loans and 2% for loans under close monitoring) over risk amount calculated pursuant to the provisions of "Communiqué on Measurement and Assessment of Capital Adequacy of Banks" for non-cash loans, commitments and derivative financial instruments. While it is determined in the Regulation on Provisions that specific provision of at least 20%, 50% and 100% must be allocated for loans in groups 3, 4 and 5, respectively, which are classified as non-performing loans (deferred for more than 90 days), a specific provision of 100% is allocated for all loans under follow-up groups of receivables, regardless of their collaterals, pursuant to the precautionary principle.

iv. Definitions of restructured receivables

Real/legal persons using credit may, from time to time, face usual risks of business life such as failure to include the excessive cost increases in sales prices, loss of market share and turnover, unexpected expenses, problems in collection of receivables due to some factors that are beyond reasonable control of its own businesses or other businesses worked with. They may therefore have temporary liquidity difficulties. It involves setting new loan repayment maturities in line with cash flows for businesses which have no significant problem in credit worthiness and sustain their income-generating activities but fail, or priorly imply failure, to make their loan repayment in a timely manner due to temporary liquidity problems.

⁽¹⁾ The amounts in the table are the installment amounts due for installment loans and the overdue principal amounts for other loans and the sum of remaining principal amounts of installment loans is 3.484.322 TL.

vii. Breakdown of restructured receivables by allocation of provision

Out of the Bank's total restructured loans amounting to TL 8.312.683, a portion of TL 8.112.945 consists of performing loans and remaining portion of TL 199.738 consists of non-performing loans. While the specific provision allocated for non-performing loans amounts to TL 199.567, no specific provision was allocated for non-performing loans of TL 171, whose risk is not assumed by the Bank.

2) Credit risk mitigation

a) Qualitative requirements to be disclosed to public regarding credit risk mitigation techniques

i. Basic characteristics of policies and processes on the extent of utilization of on-balance sheet and off-balance sheet netting

The practice of on-balance sheet and off-balance sheet netting is not used while mitigating credit risk within the Bank.

3) Credit risk if standard approach is used

a) Qualitative explanations on ratings used by the banks while calculating credit risk with standard approach

i. Names of Credit Rating Agencies (CRA) and Export Rating Agencies (ERA) used by the Bank and the reasons in case of any change during the reporting period

The Bank uses ratings of Fitch Ratings International Rating Agency while calculating the amount subject to credit risk through standard approach.

ii. Risk classes using CRA and ERA ratings

Grades of Fitch Ratings International Rating Agency are used for receivables from central government and central bank of our country as well as for foreign-based counter parties. Resident counter parties are accepted as “gradeless” and take risk weight appropriate for “gradeless” category in relevant risk class.

Rating grades are used in risk classes of Receivables from Central Governments or Central Banks and Receivables from Banks and Brokerage Houses.

iii. Explanation on how credit rating of debtor is used for other assets of debtor in banking accounts

For determination of risk weight regarding items included in banking accounts which are subject to issue or issuer rating, issue rating is considered first, and issuer’s credit rating is considered in the absence of issue rating.

While the rating assigned by Fitch Ratings International Rating Agency corresponds to credit quality level 3 in the risk class "Receivables from Central Governments or Central Banks", ratings used for the risk class "Receivables from Banks and Brokerage Houses" match with different credit quality levels.

iv. Matching rating grades on the basis of risk

Rating grade assigned by a credit rating agency that is not listed in the BRSA's matching table is not used in calculations.

IX. EXPLANATIONS ON CONSOLIDATED RISK MANAGEMENT(Continued)

4) Credit risk under Internal Ratings-Based (IRB) Approach

Standard approach is used in the Bank's credit risk calculations.

3. Counter Party Credit Risk Explanations

a) Qualitative explanations on counter party credit risk

i. Risk management goals and policies for CCR

As part of the Bank's counter party credit risk management, the functions of identification, measurement, monitoring and controlling of counter party credit risk are conducted in line with the structure, size, complexity and growth rate of products and activities, and the analysis, including stress test, and its results are reported to the Top Management.

As part of capital adequacy ratio calculations, activities for counter party credit risk are an integral part of planning, monitoring and controlling of total risk profile, and counter party credit risk management is integrated to periodic risk management process.

In the scope of counter party risk management, it is aimed to meet legal obligations and to establish and maintain counter party credit risk management infrastructure that is flexible and structured enough to accommodate the best practices. Accordingly, it is planned to conduct stress test activities, improve counter party credit risk signal and limit structure and conduct relevant monitoring function.

ii. Operational limit allocation method specified in the scope of internal capital calculated for CCR and CCP risks

Critical thresholds (signal and limit values) indicating that limits are approached due to internal or external developments have been identified. In the event that these values are approached or exceeded, relevant units take required actions.

Parameters for signal and limit structure and limit values of parameters are determined by consulting the relevant units and implemented at the Bank upon approval of the Audit Committee and Board of Directors.

Internal limits are determined by considering the Bank's budget, strategy and expectations for upcoming years, developments in Turkey and abroad, and historical realization of risks.

iii. Policies for establishing guarantee and other risk mitigation and CCR, including CCP risk

In an attempt to identify the counter party credit risk that the Bank may face, risk measurement and monitoring activities are performed and their results are considered in strategic decision-making process.

Our risk management structure involves activities to ensure that counter party credit risk measurement system functions and is maintained in line with the best practices, legal regulations, fields of activity and product ranges in a consistent, reliable and integrated way.

As part of counter party credit risk management, stress test scenarios were created by anticipating any unfavorable developments in macroeconomic conditions and the Bank's balance sheet. Results of stress test analysis are considered while establishing risk management policies.

IX. EXPLANATIONS ON CONSOLIDATED RISK MANAGEMENT(Continued)

Amount subject to counter party credit risk is calculated with appraisal method based on its fair value in accordance with the Communiqué on Measurement and Assessment of Capital Adequacy of Banks and provisions in Appendix-2, and reported on a monthly basis. Accordingly, replacement cost and potential counter party credit risk amounts are calculated. Furthermore, capital obligation is also calculated for credit appraisal adjustment for all derivatives.

Additionally, compliance of transactions posing counter party credit risk with thresholds within signal and limit structure is monitored and research is conducted for counter party credit risk calculations with advanced methods.

iv. Rules for countertrend risk

Boasting a strong lending and collateralization structure, the Bank avoids collateralization in positive correlation with the debtor's credibility and activities in connection with risk mitigation techniques are performed by considering qualitative criteria specified in legal legislation for calculation of amount subject to credit risk.

v. Amount of additional collateral that the Bank must submit in case of a decline in credit rating

As the Bank has no transactions in connection with credit rating, there is not any additional collateral amount it must pay.

a) Qualitative information to be disclosed to public on market risk

i. The Bank's process and strategies: A disclosure on the Bank's strategic goals for trading activities is made in a manner that includes processes for identification, measurement, monitoring and controlling of the Bank's market risks, hedging processes and strategies/processes for monitoring continuity of hedging efficiency

For the purposes of market risk aversion in line with financial risk management, the Bank has identified market risk management activities in accordance with the Communiqué on Measurement and Assessment of Capital Adequacy of Banks and the Regulation on the Internal Systems and Internal Capital Adequacy Assessment Processes of Banks and has taken required precautions.

The Bank's market risk management policies and implementation procedures have been specified in the scope of the Regulation on Risk Management, Stress Test Program and ICAAP approved by the Board of Directors.

The Bank ensures that measurement, monitoring, limiting, stress test and scenario analysis activities are conducted in line with the structure and complexity of its positions for market risk management and their results are reported periodically. Activities sustained are conducted over a trading portfolio specified by the Bank's Treasury Management and other activities subject to market risk.

IX. EXPLANATIONS ON CONSOLIDATED RISK MANAGEMENT(Continued)

The amount subject to market risk is calculated and monitored with standard method and advanced measurement method at the Bank. Furthermore, scenario analysis and stress tests are also conducted periodically.

ii. Organization and structure of market risk management function: Definition of market risk management structure established for implementation of the Bank's strategies and processes as mentioned in line "i)" and definition of communication mechanism and relationship between different parties involved in market risk management

Market risk management is a subunit of Risk Management Group Presidency, one of internal systems units established independently from executive units of the Bank.

Market risk management activities are conducted in line with the Regulation on Risk Management, Stress Test Program and ICAAP approved with the Board Decision no. 15/18 dated 28 April 2015 and performed by aiming the best practices in this structure.

The Bank's trading activities and transactions subject to market risk are monitored and measured regularly, and required practices are performed for risk management. Required reports on market risk are submitted to relevant units and the Bank's Top Management regularly.

iii. Structure and scope of risk reporting and/or measurement systems

The amount subject to the Bank's market risk is calculated on a monthly basis with the standard method and included in the Bank's capital adequacy ratio.

Apart from the standard method, Value at Risk (VaR) estimations are made for trading accounts on a daily basis and reported to relevant units. VaR calculated with Historical Simulation Method is used in daily reporting and limit measurement with a confidence level of 99%. VaR can be calculated with Parametric and Monte Carlo Methods in addition to Historical Simulation Method. Backward testing is performed so as to measure performance of used model and monitor market realization. Also, the Bank performs stress tests and scenario analyses on a daily and monthly basis so as to observe the effect of excessive market fluctuations that are not covered in the models on the Bank's financial position. Scenario analysis and stress test activities are audited and improved regularly in line with the market dynamics.

The market risk exposure is restricted with VaR-based limits (interest rate and currency risk limit) within the context of the Regulation on Risk Management, Stress Test Program and ICAAP. Market risk limits are determined by the Bank's Board of Directors.

6. Explanations on the Operational Risk

In the Bank, Amount subject to Operational Risk is calculated with Basic Indicator Approach based on yearly. The parameter which determines the amount subject to operational risk in Basic Indicator Approach is gross revenue. Yearly gross revenue is calculated by adding net interest incomes to net fees and commission income, dividend income obtained from shares excluding shares of subsidiaries and associates, trading profit/loss (net) and other operating incomes and also by deducting profit/loss gained from sale of assets monitored out of purchase-sale account, extraordinary incomes, operating expense made against support service and amounts compensated from insurance.

Within the scope of the performances for modeling with the Advanced Measurement Approach of operational risk, based on the data in Operational Risk Loss database, Operational Value at Risk (OpVAR) measurements are calculated using Monte Carlo Simulation within the scope of Loss Distribution Method.

7. Explanations on the Interest Rate Risk for Banking Accounts

Banking accounts interest rate risk management strategy policy and implementation procedures are determined within the context of “Regulation on Risk Management, Stress Test Program and the Bank’s Internal Capital Adequacy Assessment Process (“ICAAP”)”.

Bank performs scenario analysis with measurements that are suitable for structure and complexness of positions related to the market risk management, limiting, scenario analysis and stress test and also reports the findings cyclically. Bank’s perform analysis related to interest rate risks for the entire balance sheet. New products and services are also evaluated from the point of interest rate risk that is originated from banking accounts.

In the risk management, the following methods are followed at minimum level: The follow-up of rate and maturity mismatch between sources and uses of fixed and variable interest rates, the analysis and follow-up of the effects of the usual and unusual changes in interest rates which is possibly uptrend and downtrend on the interest margin and on the current value of assets and liabilities, the analysis and follow-up of contractual maturities as well as behavioral maturities assets and liabilities, monitoring closely of interest margins for provided Turkish Liras and foreign currency, the follow-up of the effects of interest rate changes on Bank’s economic value and capital requirement, the follow-up of potential impacts of valuation methods, the calculation and the determination of the size of interest rate shock in Bank’s internal applications, the follow-up of yield curve, basis risk and option risk. Also, in order to limit the impact of interest rate changes on Bank’s financial structure, the interest rate risk limit arising from banking accounts which is approved by the Board of Directors is followed monthly.

Receivables from money markets, receivables from banks and bank deposits are of short term nature, therefore carrying values are considered as fair value.

In determination of book and fair value of available-for-sale securities, market prices are taken into consideration. If these securities are not traded in an active market, the indicator prices calculated by CBRT are taken into account.

The fair value of held to maturity financial assets is calculated by considering market prices. In cases where these prices cannot be determined, the fair value is assessed on the basis of market prices quoted for securities that have the same attributes in terms of interest, maturity and other terms.

The fair value of loans and other deposits represent the sum of the cost and the accrued interest.

a) Information on fair value measurements recognized in the financial statements:

According to TFRS 7 “Financial Instruments: Explanations” Standard, the accounts recognized with the fair value in the balance sheet should be presented and classified sequentially in the related footnotes. Respectively, such financial instruments are classified in three levels representing the importance of the data used during for the measurement of fair values. At level one, the financial instruments whose fair values are determined with the recorded prices in the active markets for the assets and liabilities with identical fair values; at level two, the financial instruments whose fair value is based on the directly or indirectly observable market indicators and at level three; the financial instruments whose fair value is not based on the directly or indirectly observable market indicators are considered. The financial instruments which are recognized with their fair values at the Parent Bank’s balance sheet, are presented with respect to such basis of classification in the table below:

j) Information on liquidating policy of uncollectible loans and other receivables:

Execution proceedings are carried out for the collection of receivables from loan services of the Parent Bank's. During this process, tangible guarantees constituting guarantees of receivables of the Parent Bank and assets of the debtor(s) are realized while receivables of the Parent Bank are also tried to be collected and liquidated by means of administrative procedures. Transactions are performed within the context of legislation agreement, which ensures the collection of receivables through administrative channels, and authorizations transferred to the Branch/Regional Management. When the debtor offers exceed authorizations transferred to the Branch/Regional Management or includes matters outside the scope of current legislation agreements and the Branch/Regional Management submit favorable opinion to the Head Office regarding this issue, receivables should be restructured on a company/debtor basis in accordance with the decisions made by the related authorities.

16. Information on deferred tax asset:

Deferred tax is recognized on differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit in accordance with the Turkish Accounting Standards (TAS 12) “Income Taxes”. In the computation of deferred tax, effective tax rates as of the balance sheet date are used in accordance with the current tax legislation.

Deferred tax assets are recognized for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilized. Calculated deferred tax assets and deferred tax liabilities are net off in the financial statements.

Information on calculated deferred tax including deductible temporary differences, financial losses, tax deductibles and tax exemptions is shown below:

⁽¹⁾ In Bulgaria and Greece, since both real person and legal entity’s saving deposits are under the guarantee of insurance and since such balances included in insurance limit are calculated by the system, the legal entity saving deposits amounting to TL 47.282 and TL 13.226 respectively, cannot be decomposed by type and are therefore included in the table above (31 December 2015: Bulgaria and Greece, TL 57.299 and TL 7.465, respectively).

⁽²⁾ Related deposit balances do not include foreign branches.

Based on the Council of Minister’s decree dated 29 December 2003 and numbered 2003/6668, TL 940 of demand deposits is not included in the above calculation, since the Bank paid the saving deposits amount attributable to T. İmar Bank T.A.Ş.

Savings Deposit Insurance Fund premiums are calculated based on deposit amount attributable to real persons in domestic branches of banks. As total of capital amount and interest expense accruals of saving deposits up to TL 100 attributable to a real person is covered by the insurance, TL 514.083 of interest expense accrual is included in the above-mentioned figures in accordance with the Communiqué on Insurance Deposits and Participation Funds and Premiums Collected by the Savings Deposit Insurance Fund published in the Official Gazette dated 15 February 2013 and numbered 28560.

2) Information on saving deposits/real persons’ private current and accession accounts not related to commercial transactions in a Turkish branch of the Parent Bank whose head office is abroad, and reasons if it is covered in where the head office is located (Information belongs to the Parent Bank):
