SECTION III: ACCOUNTING POLICIES

I. BASIS OF PRESENTATION

According to Article 37 of the Banking Act No:5411, consulting the associations of institutions and the Turkish Accounting Standards Board, banks should apply uniformity in their accounting systems in line with the principles and procedures established by the Banking Regulation and Supervision Agency (BRSA) based on the international standards; correctly record all their transactions; and timely and correctly prepare their financial reports in a style and format that will meet the requirements of providing information, that is clear reliable and comparable and suitable for auditing, analysis and interpretation. Besides, as also stated in 1st Provisional Article of the related Act, “Any legislation, which has been put into force, based on repealed provisions and the provisions, shall remain in force and effect before any decrees, regulations and communiqués shall be put into effect in accordance with the related Act that are not in conflict herewith”.

In this context; the Bank’s unconsolidated financial statements are prepared in accordance with the Communiqué on “Procedures and Principles Regarding The Accounting Practices and Documentation of Banks” published in the Official Gazette No: 26333 on November 1, 2006, the Turkish Accounting Standards (TAS) and Turkish Financial Reporting Standards (TFRS) effective by the Turkish Accounting Standards Board. The Bank’s accounting records are maintained in accordance with the Banking Act, Turkish Commercial Code and Turkish Tax Legislation.

Balance sheet and statement of off-balance sheet items are presented comparatively with December 31, 2007 audited balances, while, income statement, cash flow statement and statement of shareholders’ equity are presented comparatively with June 30, 2007 reviewed balances.

Unless otherwise specified, all balances in the financial statements and footnotes are expressed in thousands of New Turkish Lira (Thousand TRY).

II. EXPLANATIONS ON STRATEGY OF USE OF FINANCIAL INSTRUMENTS AND FOREIGN CURRENCY TRANSACTIONS

Main activity of the Bank comprises banking services, such as; launching all kinds of cash and non-cash loans in terms of Turkish Lira and foreign currencies, performing transactions in local, international money and capital markets, supporting agricultural sector financially and collecting deposits in Turkish Lira and foreign currencies. The Bank’s main funding source is Turkish Lira deposits, shareholders’ equity and funds transferred from the budget, ministerial offices and other public resources to the Bank by means of legislative and administrative decisions The Bank directs these funds to assets with high return and low risk. These assets include predominantly government securities and loans. The Bank’s liquidity structure covers the financing of all liabilities at due date. Although most of the sources in the Bank’s balance sheet are with fixed interest rate, rate of return of some of the securities in assets are floating. Since the remaining time of the source re-pricing is short, cost of sources is repriced in short periods based on the market conditions. Moreover, the Bank adopts high return principle for its long-term placements.

Loans and securities are instruments from which the Bank gets returns above the average returns within its fields of activity. Letter of guarantees, commercial letter of credits, repayment commitments for cheques and expense limit commitments for credit cards are the most important risk areas in the off-balance sheet accounts.

(Amounts expressed in Thousand of the New Turkish Lira (TRY) unless otherwise stated.)

SECTION III: ACCOUNTING POLICIES (cont'd)

II. EXPLANATIONS ON STRATEGY OF USE OF FINANCIAL INSTRUMENTS AND FOREIGN CURRENCY TRANSACTIONS (cont'd)

Since the Bank's total debt to the market is low among its total liabilities, the Bank can borrow easily from short-term markets, such as; İstanbul Stock Exchange repo, Central Bank of the Republic of Turkey, Money Market or Interbank Money Market in case of need. In case of a liquidity crisis, the deposit base of the Bank is not presumed to be significantly affected from such a case due to the Bank being a public bank with an extensive branch network.

Cost and return of foreign currency assets are subject to a close follow up. Positive margin of profit is sustained by adjusting deposit interest rates in line with the market interest rates.

Foreign currency operations are recognized at transaction date and valued by Bank's prevailing counter currency buying rate. At period ends, foreign currency asset and liability balances are valued at the Bank's period end counter currency buying rates and translated to Turkish currency and the resulting exchange differences are recognized as a foreign exchange gain or loss.

Except for the Cyprus branches, assets and liabilities of the abroad branches of the Bank are translated into TRY according to the Bank's prevailing counter currency buying rates at the balance sheet date while, profit and loss are translated based on the average rates. Resulting differences from translation are followed under equity as other capital reserves.

Valuation differences arising from the translation of foreign currency investments compared with cost of Bank's share in associates, subsidiaries and entities under common control to TRY, are accounted under equity as other capital reserves.

III. EXPLANATIONS ON FORWARD AND OPTION CONTRACTS AND DERIVATIVE INSTRUMENTS

The derivative instruments of the Bank are composed of TRY-foreign currency and foreign currency-foreign currency swaps and foreign currency forward agreements. The Bank has no embedded derivative instruments separated from the host contract.

The derivative instruments of the Bank are classified as trading or hedging instruments in accordance with Turkish Accounting Standard on "Financial Instruments: Recognition and Measurement" (TAS 39). The Bank has no derivative instruments for hedging purposes as of the balance sheet date. Accordingly, the Bank is not subject to conditions whether derivative instruments meet the determination criteria for classifying as hedging instruments or whether such derivative transactions are finalized through sale, term expiry or fulfillment of obligations under the contract.

Derivative financial instruments are carried at their fair value as of their agreement date and revalued by internal rate of return method in post reporting periods. When value difference is positive, value differences arising from the valuation are shown in the balance sheet as "Held for Trading Derivative Financial Assets" and when value difference is negative, value differences arising from the valuation are shown in the balance sheet as "Held for Trading Derivative Financial Liabilities" and they are recognized under "Profit/Loss from Capital Market Transactions" in the income statement.

FOR THE PERIOD ENDED JUNE 30, 2008**

(Amounts expressed in Thousand of the New Turkish Lira (TRY) unless otherwise stated.)

SECTION III: ACCOUNTING POLICIES (cont'd)

IV. EXPLANATIONS ON INTEREST INCOME AND EXPENSES

Interest income and expenses are recognized on an accrual basis using the internal rate of return method in conformity with TAS 39 “Financial Instruments: Recognition and Measurement.” In accordance with the Communiqué on “Methods and Principles on Determining the Nature of Loans and Other Receivables and Allocation of Provisions” came into force after being published in the Official Gazette No: 26333 dated November 1, 2006, no interest accrual is calculated for non-performing loans. Realized interest accruals calculated for non-performing loans and recognized as income although not collected are reversed and interest income related to these loans is recognized as an interest income only when they are collected.

V. EXPLANATIONS ON FEES AND COMMISSION INCOME AND EXPENSES

Income from banking, agency and intermediary services of commissions is recognized as income on the date they are collected. Whereas, commission income from individual, trade and agricultural loans and other operating expenses are recorded as income and expense are amortized on an accrual basis by using internal rate of return method.

VI. EXPLANATIONS ON FINANCIAL ASSETS

Financial instruments comprise financial assets and liabilities and derivative instruments. They are included in the balance sheet of the Bank, if the Bank is a legal party to these instruments.

Financial instruments mainly constitute the Bank’s commercial activities and operations. These instruments have the ability to expose, affect and diminish the liquidity, credit and interest rate risks in the financial statements.

Cash equivalents and balances regarding banks are valued by the period end counter foreign currency buying rate of the Bank.

Financial assets held for trading are securities that are either acquired for generating a profit from short-term fluctuations in price or dealer’s margin, or are securities included in a portfolio for the sake of short-term profit making.

Trading securities are initially recognized at cost including the transaction costs and carried at fair value in the financial statements.

Government bonds and treasury bills included in held for trading portfolio and available for sale portfolio traded in İstanbul Stock Exchange (ISE) are carried at effective weighted average ISE prices as of the balance sheet date and those securities that are not traded in ISE are carried at prices of the Central Bank of Republic of Turkey. Whereas, eurobonds are carried at prices of over the counter markets.

The difference between the cost and fair value of held for trading securities is accounted under “Other interest and income accrual” or “Impairment loss for marketable securities” account. Interest received from financial assets held for trading is reflected under interest income.

Investments held to maturity include financial assets where there is an intention of holding until maturity and the relevant conditions for fulfillment of such intention, including the funding ability, and where there is fixed or determinable payments with fixed maturity;

SECTION III: ACCOUNTING POLICIES (cont'd)

VI. EXPLANATIONS ON FINANCIAL ASSETS (cont'd)

Loans and receivables represent financial assets other than those held for trading or held for sale in a short period generated through providing cash, assets or rendering services to the debtor;

Financial assets available for sale include all securities other than loans and receivables, and those held to maturity and held for trading.

Financial assets are classified as securities held-to-maturity, loans and receivables, financial assets available for sale or held-for-trading at their acquisition dates.

Securities held-to-maturity, financial assets available for sale, and loans and receivables are initially carried at cost.

Held to maturity securities are subsequently measured at amortized cost with internal rate of return, and they are accounted for by setting forth provision for impairment loss or by posting interest accrual.

The Bank does not have any financial instruments that are previously classified as held-to-maturity investments but prohibited to be classified as held-to-maturity investments for two years because of incompliance with the principles of securities classification.

Interests received from securities held to maturity are recognized as an interest income.

Financial assets available for sale are subsequently measured at amortized cost with internal rate of return, and they are accounted for by setting forth provision for impairment loss or by posting interest accrual. Fair values and amortized costs of those securities are subject to comparison and the difference is presented under shareholders' equity as a "Revaluation Fund". Amortized values and costs are also compared and the difference is recognized as an interest income/expense for impairment loss.

Sale and purchase transactions of financial assets are accounted for at the settlement dates.

Loans originated by the Bank are to be measured at amortized cost with internal rate of return. Short-term and long-term TRY loans are grouped as open or guaranteed, FC loans are classified as open or guaranteed, recognized with fixed price and at period-ends revalued by the counter foreign exchange buying rate of the Bank. Foreign exchange indexed loans are used as TRY by the valid counter foreign exchange buying rate of the Bank at usage date. Repayments of these loans are collected as calculated TRY value by the valid counter foreign exchange selling rate of Bank at installment date.

The Bank set specific and general provisions for loans and other receivables in accordance with the regulations stated by the Communiqué published on the Official Gazette No: 26333 dated November 1, 2006 on "Methods and Principles on Determining the Nature of Loans and Other Receivables and Allocation of Provisions". However, the Bank does not limit the provision amount with the minimum rates defined in related regulation and allocates 100% specific provision for such loans. Allocated provisions are deducted from the income for the period. If the loans for which provisions were set in the previous year are collected, provision for allowances are released and recognized as income under "Other Operating Income" account. Releases of current period provisions are made by the reversal of the amount from the "Provision for Impaired of Loans and Other Receivables" account.

FOR THE PERIOD ENDED JUNE 30, 2008**

(Amounts expressed in Thousand of the New Turkish Lira (TRY) unless otherwise stated.)

SECTION III: ACCOUNTING POLICIES (cont'd)

VII. EXPLANATIONS ON IMPAIRMENT OF FINANCIAL ASSETS

A financial asset or a group of financial assets is subject to impairment loss only if there is an objective indication that the occurrence of one or more than one event (“loss event”) subsequent to the initial recognition of that asset has an effect on the reliable estimate of the expected future cash flows of the related financial asset and asset group.

If revalued amounts of financial assets at fair value through profit/loss is less than the prior revalued amounts, initially, value of prior records regarding the value increase are adjusted according to the recent value and if the impairment loss is more than the prior value increase, difference is reflected to “Value Loss Expenses for Securities”. If there is an increase in value, initially recognized impairment loss is reversed.

If financial assets available for sale are subject to permanent impairment, the amount is charged to “Value Loss Expenses for Securities” account in accordance with the related Turkish Accounting Standard.

Loans and other receivables are classified in accordance with the Communiqué on “Methods, Principles on Determining the Nature of Loans, Other Receivables, and Allocation of Provisions” published in the Official Gazette numbered 26333 and dated November 1, 2006. However, the Bank does not limit the provision amount with the minimum rates defined in related regulation and allocates 100% specific provision for such loans and they are recognized in the statement of income. Collections made related to those loans are offset against the principal and interest collections are recognized under the “Interest Received from Non-performing Loans” item in the income statement.

In accordance with the provisions of the above mentioned legislation, the Bank allocates general loan provisions for loans and its receivables in addition to specific provisions. Based on the decision of Bank’s Asset and Liability Management, total loans excluding loans originated from funds whose risk is not borne by the Bank general provision ratio is stated as 3%. Additional provision booked in financial statements with the so-called decision is recorded under other provisions within the balance sheet.

VIII. EXPLANATIONS ON OFFSETTING FINANCIAL ASSETS AND LIABILITIES

Financial assets and liabilities shall be offset and the net amount presented in the balance sheet when, and only when a party currently has a legally enforceable right to set off the recognized amounts or intends either to settle on a net basis or to realize the asset and settle the liability simultaneously.

**NOTES TO THE UNCONSOLIDATED FINANCIAL STATEMENTS
FOR THE PERIOD ENDED JUNE 30, 2008**

(Amounts expressed in Thousand of the New Turkish Lira (TRY) unless otherwise stated.)

SECTION III: ACCOUNTING POLICIES (cont'd)

IX. EXPLANATIONS ON SALES AND REPURCHASE AGREEMENTS AND TRANSACTIONS ON SECURITIES LOANED

Securities subject to repurchase agreements are classified under “securities held for trading”, “securities available for sale” and/or “securities held-to-maturity” portfolios and they are valued based on the valuation principles of the related portfolios.

Total costs including the interest income accrual amount of held to maturity and available for sale securities sold under repurchase agreements amount to TRY 220,633 Thousand (December 31, 2007: TRY 196,230 Thousand), and TRY 1,846,976 Thousand (December 31, 2007: None) respectively. Funds obtained against these agreements are followed under the “Funds from Repurchase Transactions” account in the balance sheet and interest expense accrual is calculated by the internal rate of return method. As of June 30, 2008 the Bank has no reverse repo transactions (December 31, 2007: TRY 2,611,226 Thousand).

As of the balance sheet date, there are no loaned securities.

X. EXPLANATIONS ON TANGIBLE FIXED ASSETS HELD FOR SALE AND DISCONTINUED OPERATIONS AND THE LIABILITIES ABOUT THOSE FINANCIAL ASSETS

The Bank has no discontinued operations. Tangible assets acquired in consideration of receivables are accounted for in accordance with the requirements of the Communiqué on “Methods and Principles for Purchase and Sale of Precious Metal and Sale of Goods and Immovables obtained in Return of Receivables” published in the Official Gazette No: 26333 and dated November 1, 2006 and these assets are subject to revaluation by no means.

The Bank’s immovables acquired amount to TRY 2,024 Thousand consisting of TRY 1,871 Thousand on its commercial loans and TRY 153 Thousand on its agricultural loans. Total assets held for sale together with its movables amounting to TRY 50 Thousand equal to TRY 2,074 Thousand. Total depreciation expense is TRY 47 Thousand for these assets.

XI. EXPLANATIONS ON GOODWILL AND OTHER INTANGIBLE ASSETS

As at the balance sheet date, the Bank has no goodwill within the financial statements.

Other intangible assets are carried at historical costs and are amortized by using the straight-line method based on their useful lives.

Useful lives of other intangible assets are determined by the consideration of items as; useful life of asset, maintenance costs incurred to obtain expected economical benefit from assets and technical, technological or any other type of obsolescence. Amortization method used in the current period is not subject to any change. Annual depreciation rate is 20% (5 years) for establishment/formation expenses with uncertain leasing period or leasing period over 5 years and depreciation rate is proportional with period for those with certain leasing period.

The Bank recognizes its software costs incurred under the intangible assets-intangible rights account and they are subject to amortization for 3 years by adding constructive expenses to the initial cost of software considering their useful lives.

**NOTES TO THE UNCONSOLIDATED FINANCIAL STATEMENTS
FOR THE PERIOD ENDED JUNE 30, 2008**

(Amounts expressed in Thousand of the New Turkish Lira (TRY) unless otherwise stated.)

SECTION III: ACCOUNTING POLICIES (cont'd)

XII. EXPLANATIONS ON PROPERTY, PLANT AND EQUIPMENT

Property, plant and equipment are carried at cost and if results of appraisal reports exceed the costs they are not subject any revaluation. The Bank's property, plant and equipment purchased before January 1, 2005 are carried at restated cost in the balance sheet before December 31, 2004 and its property, plant and equipment that are purchased subsequent to January 1, 2005 are valued at historical cost. Subsequent to recognition, property, plant and equipment are presented in financial statements at cost less any accumulated depreciation and impairment loss, if any. Property, plant and equipment are amortized by using the straight-line method over their estimated useful lives. No changes made in the current period regarding depreciation method.

Estimated depreciation rates of property, plant and equipment are as follows:

Buildings	: 2%
Vehicles, Furniture and Fixtures	: 2 – 20%

Gain or loss arising from the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of that asset and is recognized in profit or loss.

Ordinary maintenance and repair expenses of property, plant and equipment items are recognized as expenses. Investment expenditures that increase the future benefit by enhancing the capacity of tangible assets are included to the cost of tangible asset.

There are no mortgages, pledges or similar precautionary measures on property, plant and equipment, or commitments given for the purchase or any restrictions designated for the use of those property, plant and equipment.

XIII. EXPLANATIONS ON LEASING TRANSACTIONS

The Bank, as the lessee, recognizes its leasing operations in accordance with the requirements of the Turkish Accounting Standards (TAS 17) "Leases". Fixed assets that are acquired under financial leasing are amortized with respect to the rates used for directly acquired assets that have similar nature. Assets held under financial leases are recognized under the property, plant and equipment account and are depreciated on annual and monthly basis with respect to their useful lives. Principal and installment paid for property, plant and equipment that are acquired under financial leasing are charged to liability account "Finance Lease Payable", whereas interests are recognized in "Deferred Financial Leasing Expenses" account. At installment payments, principal and interest amount of installment amount are debited to "Financial Lease Payable" account, whereas interest is credited in "Deferred Financial Leasing Expenses" account and recorded to the other interest expenses.

As of the balance sheet date, the Bank has no financial leasing operations as a lesser.

FOR THE PERIOD ENDED JUNE 30, 2008**

(Amounts expressed in Thousand of the New Turkish Lira (TRY) unless otherwise stated.)

SECTION III: ACCOUNTING POLICIES (cont'd)

XIV. EXPLANATIONS ON PROVISIONS AND CONTINGENT LIABILITIES

In case of an existing liability (legal or implicit) as a result of an incident that took place in the past, the possibility of disposal of assets that bring economic benefit and the liability is measurable, the Bank provides provision.

Provisions other than the specific and general provisions set for loans and other receivables and provisory liabilities are accounted in accordance with “Provisions, Contingent Liabilities and Contingent Assets Corresponding Turkish Accounting Standard” (TAS 37).

For transactions that can affect financial structure, provisions are provided by using the existing data if they are accurate, otherwise by using the estimates.

Since the Bank has no centralized database for the outstanding lawsuits, summary of the number and amount of those lawsuits cannot be obtained from the data processing system. However, in accordance with the information provided by the legal department, no provision is provided for the individual lawsuits against the Bank over TRY 100 Thousand with a total of TRY 205,271 Thousand due to the fact that these are not deemed to have material effect over financial statements.

As of the balance sheet date, there are no probable contingent liabilities resulting from past events whose amount can be reliably measured.

XV. EXPLANATIONS ON EMPLOYEE BENEFIT LIABILITIES

Employee benefits liabilities are recognized in accordance with the Turkish Accounting Standard (TAS 19) “Employee Benefits” and the Bank provides provision for retirement and termination liabilities by estimating the net present value of future payments of the Bank arising from the retirement of employees and reflects this provision amount in the financial statements.

Under the Turkish legislation as supplemented by union agreements, lump sum payments are made to all employees who retire or whose employment is terminated without due cause. According to the related legislation, depending on the status and position of the employee in the Bank and social security institution, retirement pay provision is calculated in two ways; if the employee is a state employee, the calculation is based on retirement pension for the working period of the state employee, and if the employee is a blue-collar worker the calculation is based on the final salary at the date of retirement or leave (to the extent that the payments and/or salary amount does not exceed the Retirement Payment Provision ceiling).

As the data on the unused vacation time could not be obtained from the application system in line with the legislation that requires 10 days of paid leave to be used at minimum and the assumption that 12 days of paid vacation is used on average, unused vacation liability is calculated by deducting 12 days of paid vacation from the total earned vacation time.

As of June 30, 2008, provision allocated by the Bank for all employee benefit liabilities is TRY 494,800 Thousand. The Bank is not employing its personnel by means of limited-period contracts.

XV. EXPLANATIONS ON EMPLOYEE BENEFIT LIABILITIES (cont'd)

The Bank's personnel are the members of T.C. Ziraat Bankası and T. Halk Bankası Çalışanları Emekli Sandığı Vakfı (T.C. Ziraat Bankası and T. Halk Bankası A.Ş. Employees Pension Fund) which was established by 20th provisional article of Social Security Agency (SSK) Act of no 506. In accordance with 23rd provisional clause of the Banking Act No: 5411, the pension fund is expected to be transferred to the Social Security Agency by three years following the declaration of the Banking Act No: 5411. Procedures and principles of the transfer is determined by the decision of Council of Ministers numbered 2006/11345. However, the 1st paragraph of the 1st article of the 23rd provisional clause of Banking Act No: 5411 allowing pension funds to be transferred to Social Security Agency is annulled by Constitutional Court.

The audited technical balance sheet report as of December 31, 2007 which is prepared in accordance with the principles in the Council of Ministers decision 2006/11345 declared in the Official Gazette dated December 15, 2006 numbered 26377, which defines the principles of such transfer, with the technical interest rate of 10.24% concludes no technical deficit arises in the above mentioned fund.

In accordance with the Act No: 5754 "Act about the Amendments in Social Security and General Health Insurance Act and Some of Acts and Decrees" published in the Official Gazette No: 26870 on May 8, 2008, bank pension funds participants and salaried members or the rightful owners would be transferred to Social Security Institution and would be subject to its legislation within three years beginning from the date of publication without any required transaction. Three years transfer period would be extended by two years at most with the decision of Council of Ministers. In accordance with the related legislation, as of the transfer date, the cash value of the liabilities will be calculated by considering the income and expenses of the transferred funds by the insurance branches and by using the actuarial interest rate of 9.80%. Moreover, the unfulfilled other social rights and payments existed in the settlement deeds of the subjected pension funds of the transferred participants, members or the rightful owners will be continued to be fulfilled by the employer entities of the funds and its participants.

The Article 58 and provisional article 7 of the Banking Act, restricting banks from transferring any funds to the pension funds in order to compensate the actuarial deficits effective from January 1, 2008, has been delayed up to 5 years.

The audited technical balance sheet report as of June 30, 2008 which is prepared in accordance with the principles Act No: 5754 declared in the Official Gazete dated June 8, 2008 numnered 26870, with technical interest rate of 9.80%, concludes no technical deficit arises in the above mentioned fund.

XVI. EXPLANATIONS ON TAXATION

Corporate Tax:

In accordance with Article 6 "Taxation and Payment of Tax Payers - Determination of Tax Base" and Article 32 "Corporate Tax and Temporary Tax Rates" of the Corporate Tax Law No: 5220, corporate tax is calculated based on the net corporate income of tax-payers in an accounting period by using 20% as tax rate.

(Amounts expressed in Thousand of the New Turkish Lira (TRY) unless otherwise stated.)

SECTION III: ACCOUNTING POLICIES (cont'd)

XVI. EXPLANATIONS ON TAXATION (cont'd)

Corporate Tax: (cont'd)

In accordance with the requirements in Income Tax Act (by taking non-deductible charges, discounts and exceptions and provisions of the Tax Procedure Law on revaluation into account), corporate tax-payers pay provisional tax which is calculated with the current tax rate and will be offset against the current period's corporate tax.

Corporate tax returns are delivered to related tax administration in the period between the 1st and the 25th days of the fourth month subsequent to the end of accounting period and paid in full before the end of the related month. Nevertheless, the tax audit authorities can investigate accounting records in 5 year-period and the corporate tax payable amount may subject to a change in case of determination of any false entry.

In case of a profit on taxable base, provision is allocated for Corporate and Income Tax liability based on the results of the current period activities.

Deferred Tax Liability/Asset:

In accordance with the Turkish Accounting Standard (TAS 12) "Income Tax", the Bank calculates and recognizes deferred tax for temporary differences between tax base calculated based on to the accounting policies used and valuation principles and that calculated under the tax legislation.

Deferred tax is recognized on differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit, and are accounted for using the balance sheet liability method. Deferred tax liabilities are generally recognized for all taxable temporary differences. However, deferred tax assets are recognized for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilized. Such assets and liabilities are not recognized if the temporary difference arises from goodwill or from the initial recognition of other assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

The carrying amount of a deferred tax asset is reviewed at each balance sheet date. Carrying amount of a deferred tax asset can be reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realized and reflected in the statement of income as expense or income. Moreover, if the deferred tax is related with items directly recorded under the equity in the same or different period, deferred tax is associated directly with equity.

XVII. ADDITIONAL EXPLANATIONS ON BORROWINGS

The Bank accounts its debt instruments in accordance with the Turkish Accounting Standard (TAS 39) "Financial Instruments: Recognition and Measurement". In the following periods, all financial liabilities are valued at amortized cost by using the internal rate of return method. The Bank has no borrowings that require hedging techniques for accounting and valuation of debt instruments and liabilities representing the borrowings.

The Bank has issued no convertible bonds and has no instruments representing its own borrowings.

SECTION IV: NOTES TO THE FINANCIAL STRUCTURE OF THE BANK (cont'd)

I. EXPLANATIONS RELATED TO CAPITAL ADEQUACY STANDARD RATIO

1. The Bank's unconsolidated capital adequacy ratio, reasons and anticipated solutions in case the ratio is lower than the amount pre-determined by the Communiqué:

The Bank's unconsolidated capital adequacy ratio calculated in accordance with the Communiqué on "Measurement and Assessment of Capital Adequacy of Banks" is 15.58% (December 31, 2007: 25.44%).

2. The risk measurement methods used for calculation of capital adequacy ratio:

Capital Adequacy Standard Ratio is calculated in accordance with the Communiqué on "Measurement and Assessment of Capital Adequacy of Banks", which was published in the Official Gazette dated November 1, 2006 and numbered 26333.

In the computation of capital adequacy standard ratio, information prepared in accordance with the statutory accounting requirements is used. Additionally, the market risk, credit risk and operational risk amounts are calculated in accordance with the Communiqué on the "Measurement and Assessment of Capital Adequacy of Banks" and is taken into consideration in the capital adequacy standard ratio calculation.

Amounts deducted from the capital in the calculation of shareholders' equity are not considered in the calculation of risk-weighted assets, non-cash loans and contingent liabilities. Assets subject to depreciation and value loss among risk-weighted assets are included in the calculations over their net book values after deducting the relative depreciation and value loss.

In the calculation of the amounts subject to credit risk regarding the transactions on the non-cash loans, the net receivable amount from the counter parties is calculated by deducting the specific provision amount set in accordance with the Communiqué on "Methods and Principles on Determining the Nature of Loans and Other Receivables and Allocation of Provisions", if any, and the net amount is multiplied by the conversion rates presented in Clause 1 in Article 5 of the Communiqué on "Measurement and Assessment of Capital Adequacy of Banks". Then the risk ratios declared in the Capital Adequacy Analysis Form are used to weight the resulting amount.

To calculate the loan amount subject to credit risk for foreign exchange and interest rate transactions, receivables from counter parties are multiplied by the conversion rates stated in Clause 2, Article 5 of the Communiqué on "Measurement and Assessment of Capital Adequacy of Banks" and weighted by risk weights declared in the Capital Adequacy Analysis Form.

Since the ratio of financial assets available for sale is above 10% of the Bank's total securities, this account is considered as held for trading and is not included in risk weighted assets in current period in accordance with the additional article of Communiqué on "Measurement and Assessment of Capital Adequacy of Banks which is effective from January 1, 2008. For determining market risk base amount, the capital requirement is calculated for these balances with regards to general market and specific risk.

SECTION IV: NOTES TO THE FINANCIAL STRUCTURE OF THE BANK (cont'd)

II. EXPLANATIONS RELATED TO THE MARKET RISK

a) Whether measures are taken for hedging against market risk under the framework of the Bank's risk management policies, measures taken for the risk management by the Board of Directors when the Bank is exposed to market risk, methods used to measure market risk and timing of market risk measurement:

The Bank has established market risk management operations and taken the necessary measures in order to hedge against market risk within its financial risk management purposes, in accordance with "Measurement and Assessment of the Capital Adequacy of Banks" issued in the Official Gazette numbered 26333 and dated November 1, 2006.

"T.C. Ziraat Bankası A.Ş. Market Risk Management Policy and Application Procedures" document exists so as to determine strategies when the Bank is exposed to market risks and to develop market risk managerial policy and application procedures.

Market risk management strategy policy and implementation procedures of the Bank are determined within the context of "Market and Financial Statement Risks Management Regulation".

Bank pays attention not to change the position materially in the view of foreign exchange position management and maximum position amount is limited. Also, there is position limit application for limiting interest rate risk stated within the context of market risk of the Bank.

Bank reaches amount subject to the total market risk by using Standard Method as per monthly periods within the context of legal reporting. This amount is included in the calculation of the Bank's Standard Capital Adequacy Ratio.

Daily Value at Risk (VAR) forecasts are made based on financial instruments with different risk factors and portfolios in the Bank and are reported to the related units. Also, backward testing is performed so as to measure performance of the model used. The Bank limits market risk exposure by VAR based limit within the context of "Market and Financial Statement Risks Management Regulation".

Also, the Bank performs monthly market risk stress tests so as to observe the effect of excessive market fluctuations not covered by models over the Bank's financial position.

SECTION IV: NOTES TO THE FINANCIAL STRUCTURE OF THE BANK (cont'd)

II. EXPLANATIONS RELATED TO THE MARKET RISK (cont'd)

b) Average market risk table calculated at the end of each month during the period:

Not presented in interim financial statements in accordance with Article 25 Communiqué on “Financial Statements to be Publicly Announced and the Accompanying Policies and Disclosures”.

III. EXPLANATIONS RELATED TO THE CURRENCY RISK

a) Whether the Bank is exposed to foreign currency risk, whether the effects of this matter are estimated, whether limits for the daily followed positions are determined by the board of directors:

The Bank’s policy is to avoid carrying significant positions by means of foreign currency management. Therefore, the Bank is not exposed to significant currency risks. Risks are monitored by the currency risk tables prepared based on the standard method. Besides, Value at Risk (VAR) is calculated for daily foreign exchange position of the Bank and reported to the related departments.

Moreover, dealer’s positions and limits for foreign exchange transactions are under the authorization of the Board of Directors.

b) Hedge against foreign exchange debt instruments and net foreign exchange investments by hedging derivative instruments, if material:

The volume of these transactions is very low, when compared to the size of balance sheet.

c) Management policy for foreign currency risk:

“Liquidity Gap Analysis”, “Repricing Gap Analysis” and “Structural Liquidity Gap Analysis” which takes into account historical repricing rates of foreign currency accounts, are prepared periodically in order to define liquidity and interest rate risks at US Dollar and Euro, which are mainly used by the Bank in its operations. Also, daily VAR analysis for following the currency risk and within the context of legal reporting, Foreign Currency Net General Position/Shareholders’ Equity Ratio and Foreign Currency Liquidity Position are also monitored regularly.

SECTION IV: NOTES TO THE FINANCIAL STRUCTURE OF THE BANK (cont'd)

IV. EXPLANATIONS RELATED TO THE INTEREST RATE RISK

The Bank's structural interest rate management policy and methods of applications are set under the scope of "Management of Market and Balance Sheet Risks Regulation".

Within the Bank, the structural interest rate risk analysis is made based on the income and economic value approaches. Under economic value approach, Bank is applying the analysis of Standard Interest Shock that has been recommended by the Basel Committee, whereas under income approach Bank is applying Net Interest Margin/Income analysis. The Standard Interest Shock analysis is applied to interest rate sensitive balance sheet items excluding the positions subject to the market risk and the results are compared with the equity. At the Net Interest Margin/Income analysis the change in the interest income of the Bank resulting from the changes in interests is analyzed. About the structural interest rate risk the duration analysis is also applied at the Bank. Bank limits its interest rate exposure. Moreover, an early warning system covering various parameters regarding the structural interest rate risk has also been established by the Bank.

a) Measurement of interest rate sensitivity of assets, liabilities and off-balance sheet items:

Interest rate sensitivity of assets and liabilities is followed periodically by applying various analysis methods.

b) Effects of interest rate fluctuations in the market on financial position and cash flow of the Bank, expectations on interest income, limitations on daily interest rates by the Bank's Board of Directors:

To eliminate the negative effects of interest rate fluctuations in the market on the balance sheet of the Bank, Assets-Liabilities Committee follows interest margin and monitors its effects on profitability on a consistent basis. The committee makes interest rate arrangements especially for sources and defines the limits for the maximum interest rates considering the interest rate risk.

SECTION IV: NOTES TO THE FINANCIAL STRUCTURE OF THE BANK (cont'd)

V. EXPLANATIONS RELATED TO THE LIQUIDITY RISK

General principles of liquidity and financial emergency state management are considered in the scope of “Liquidity and Financial Emergency State Management Regulation” and application procedures of liquidity and financial emergency state management are considered in the scope of “Liquidity and Financial Emergency State Management Application Base and Procedures”.

Liquidity and Financial Emergency State Management Regulation consist of early warning indicators of liquidity and financial emergency state indicators, announcement procedures of these indicators and process of transition to liquidity and financial emergency state management.

a) Basis of the current liquidity risk of the Bank and whether the necessary measures taken, limitations imposed by the Bank’s Board of Directors on fund sources that can be used in payment of matured debts and can meet the immediate liquidity need:

The Bank’s sources of funds is mainly formed of deposits. The Bank’s deposits do not fluctuate considerably depending on the broadly dispersed customer network. Besides, internal and external sources that can be used to meet the immediate liquidity need are monitored periodically. Borrowing limits of the Bank from organized markets and other financial institutions can cover the corresponding liquidity gaps in different time periods. The Bank limits its liquidity risk exposure by the approval of Board of Directors within the context of “Financial Emergency State Management Regulation”.

b) Consistency of payments with the assets and liabilities and the interest rates, measurement of the probable effects of the actual inconsistency on profitability:

The consistency of payments with the assets and liabilities and the interest rates is followed regularly by the management and no inconsistency exists.

c) Internal and external sources for short and long-term liquidity needs of the Bank, unused significant liquidity sources:

Although the average maturity of the Bank’s assets is long, securities with coupon payments constituting majority of the securities portfolio supply regular cash inflow for the Bank. Besides, volume of deposits constituting the majority of the liabilities is not subject to significant changes. The Bank also provides funds from repurchase agreements, however, volume of these transactions are relatively limited.

d) Evaluation of amount and sources of the Bank’s cash flows:

The Bank’s major source of funds is deposits, and these funds are invested in securities portfolio, other banks and loan placements. Since most significant cash inflows are originated from securities portfolio and cash inflows from these assets are regular, the liquidity risk of the Bank is suggested to be reduced. Furthermore, repayments of consumer loans in the current period has role to cover the Bank’s need of fund source.

3) Employee Pension Right Liabilities for the Bank Personnel:

The Bank's personnel are the members of T.C. Ziraat Bankası and T. Halk Bankası Çalışanları Emekli Sandığı Vakfı (T.C. Ziraat Bankası and T. Halk Bankası A.Ş. Employees Pension Fund) which was established by 20th provisional article of Social Security Agency (SSK) Act of no 506. In accordance with 23rd provisional clause of the Banking Act No: 5411, the pension fund is expected to be transferred to the Social Security Agency by three years following the declaration of the Banking Act No: 5411. Procedures and principles of the transfer is determined by the decision of Council of Ministers numbered 2006/11345. However, the 1st paragraph of the 1st article of the 23rd provisional clause of Banking Act No: 5411 allowing pension funds to be transferred to Social Security Agency is annulled by Constitutional Court.

The audited technical balance sheet report as of December 31, 2007 which is prepared in accordance with the principles in the Council of Ministers decision 2006/11345 declared in the Official Gazette dated December 15, 2006 numbered 26377, which defines the principles of such transfer, with the technical interest rate of 10.24% concludes no technical deficit arises in the above mentioned fund.

In accordance with the Act No: 5754 "Act about the Amendments in Social Security and General Health Insurance Act and Some of Acts and Decrees" published in the Official Gazette No: 26870 on May 8, 2008, bank pension funds participants and salaried members or the rightful owners would be transferred to Social Security Institution and would be subject to its legislation within three years beginning from the date of publication without any required transaction. Three years transfer period would be extended by two years at most with the decision of Council of Ministers. In accordance with the related legislation, as of the transfer date, the cash value of the liabilities will be calculated by considering the income and expenses of the transferred funds by the insurance branches and by using the actuarial interest rate of 9.80%. Moreover, the unfulfilled other social rights and payments existed in the settlement deeds of the subjected pension funds of the transferred participants, members or the rightful owners will be continued to be fulfilled by the employer entities of the funds and its participants.

The Article 58 and provisional article 7 of the Banking Act, restricting banks from transferring any funds to the pension funds in order to compensate the actuarial deficits effective from January 1, 2008, has been delayed up to 5 years.

The audited technical balance sheet report as of June 30, 2008 which is prepared in accordance with the principles Act No: 5754 declared in the Official Gazette dated June 8, 2008 numnered 26870, with technical interest rate of 9.80%, concludes no technical deficit arises in the above mentioned fund.
